enterasys®
Secure Networks™

Enterasys® SecureStack™ C3 Switch
Secure, Policy-based Gigabit Ethernet Stackable L2/L3/L4 Edge Switch

High availability design assures reliable network operations

Granular QoS capabilities support converged multimedia networks

Aligns network resource utilization with business goals and priorities

PoE and IPv4 & IPv6 routing support a variety of networks and devices

Investment protection via Limited Lifetime Warranty

1.54Tbps capacity and 571.2Mpps

Benefits

Business Alignment
- Granular QoS capabilities support converged multimedia networks
- Aligns network resource utilization with business goals and priorities
- Reliable network operation for mission critical applications

Operational Efficiency
- Scalable architecture supports continued growth of network capacity
- Consolidated management capabilities reduce network operational expenses
- Security capabilities without the high overhead

Security
- Network resources securely allocated according to user roles
- Network security maintained concurrently with user mobility
- Architecture designed with integral network security

Support and Service
- Industry leading customer satisfaction and first call resolution rates
- Personalized services
- Limited Lifetime Warranty

Product Overview

Enterasys' leadership position in the switching market is further enhanced by the Enterasys® SecureStack™ C-Series stackable enterprise switches. The SecureStack C3 is a high-performance Gigabit Ethernet edge switch that provides scalable, wire-rate performance in support of the bandwidth-intensive and delay-sensitive requirements of today's demanding applications. With support for 16,000 MAC addresses, the C3 is an excellent choice for environments that require complete multilayer switching capabilities and support for high density 10/100/1000 Ethernet ports, 10GE ports, and dynamic routing capabilities. The C3 is well suited for Gigabit Ethernet networks as well as 100Base-T networks that are about to migrate to a predominantly Gigabit Ethernet network with 10GE and/or dynamic IPv4 / IPv6 routing requirements. In addition to its complete multilayer switching capabilities, the C3 also provides both IPv4 and IPv6 routing as well as multicast routing protocols. Along with a switch capacity of 192Gbps, the C3 provides up to 48 10/100/1000 Ethernet ports as well as 2 10GE uplink ports. As many as 8 C3s can be interconnected in a single stack to create a virtual switch that provides 1.54Tbps of capacity and up to 384 10/100/1000 Ethernet ports as well as 16 10GE uplink ports.

Robust quality of service (QoS) features enable strong support for integrated multimedia networks, including Voice over IP, video, as well as all types of data-intensive applications. The C3's highly customizable Layer 2/3/4 packet classification capabilities work together with the 8 hardware-based priority queues associated with each Ethernet port to support a suite of differentiated services with as many as 8 distinct priority levels. In conjunction with its non-blocking architecture, the C3's intelligent queuing mechanisms ensure that mission-critical applications receive prioritized access to network resources.

The C3 provides a secure network by utilizing its authentication and security features, which can be applied at the port level or at the user level. Making use of the NetSight® Policy Manager or a standard CLI, the SecureStack role-based architecture enables a network administrator to define distinct roles or profiles that represent operational groups within a business (e.g., employee, executive, guest, etc). Multiple users/devices per port can be authenticated via IEEE 802.1X, MAC address, or web authentication, and then assigned a predefined operational role. Network operations can be easily tailored to meet business-oriented requirements by providing each role with individualized access to network services and applications (e.g., a guest should have different network access privileges than an employee).

There is nothing more important than our customers.
