The Rule of Nobody Philip K. Howard, 2014-04-07 The secret to good government is a question no one in Washington is asking What's the right thing to do What's wrong in Washington is deeper than you think Yes there's gridlock polarization and self dealing But hidden underneath is something bigger and more destructive It's a broken governing system From that comes wasteful government rising debt failing schools expensive health care and economic hardship Rules have replaced leadership in America Bureaucracy regulation and outmoded law tie our hands and confine policy choices Nobody asks What's the right thing to do here Instead they wonder What does the rule book say There's a fatal flaw in America's governing system trying to decree correctness through rigid laws will never work Public paralysis is the inevitable result of the steady accretion of detailed rules America is now run by dead people by political leaders from the past who enacted mandatory programs that churn ahead regardless of waste irrelevance or new priorities America needs to radically simplify its operating system and give people officials and citizens alike the freedom to be practical Rules can't accomplish our goals Only humans

can get things done In *The Rule of Nobody* Philip K Howard argues for a return to the framers vision of public law setting goals and boundaries not dictating daily choices This incendiary book explains how America went wrong and offers a guide for how to liberate human ingenuity to meet the challenges of this century **Public Service, Governance and Web 2.0**

Parliamentary Debates New Zealand. Parliament,1978 Is There a Future for Regional Government? Great Britain: Parliament: House of Commons: ODPM: Housing, Planning, Local Government and the Regions Committee,2006-03-15 Is there a future for regional Government Session 2005 06 Vol 2 Written Evidence *Dealing with Public Risk in Private Infrastructure* Timothy Irwin,1997 Many infrastructure privatizations still leave governments and thus taxpayers exposed to significant financial risks This book examines these risks and considers how governments should respond to investors requests for guarantees and other forms of government support The report examines how governments can decide which risks to bear and which to avoid how they can reduce the risks that private investors face without giving guarantees and how they can measure budget and account for the risks they do take on The Future of Australian Federalism Gabrielle Appleby,Nicholas Aroney,Thomas John,2012-03-08 This volume explains and evaluates Australia s federal system and the options for reform from various comparative and disciplinary perspectives **HL 111 - Make Or Break: The UK's Digital Future** The Stationery Office,2015 This report is a call to action for the incoming Government in May 2015 The world is being transformed by a series of profound technological changes dominated by digital a second machine age This is already having a significant impact on the UK over the next two decades some economists have estimated that 35% of current jobs in the UK could become automated Digital technology is changing all our lives work society and politics It brings with it huge opportunities for the UK but also significant risks This demands an ambitious approach which will secure the UK s position as a digital leader The Committee recommends that the new Government establishes a single and cohesive Digital Agenda The potential value in doing so is significant the Government estimated that the digital sector alone was worth an estimated 105 billion in gross value added to the UK in 2011 A report by the National Institute of Economic and Social Research in 2013

meanwhile found that the size of the digital economy was almost double official estimates Whatever the difficulties in quantifying the value it is clear that digital is already a substantial driver for growth and will become much more so Digital technology is transforming much more than just one sector of the economy the whole economy has become digitised It would therefore be a mistake to take the digital sector as our sole focus of interest Digital technology is pervasive across all aspects of life so much so that the digital economy is becoming synonymous with the national economy The UK cannot afford to miss the opportunity or shirk the challenges this presents
