Silova,Daphne P. Hobson,2014-05-01 Globalization has a profound effect on the mission and goals of education worldwide One of its most visible manifestations is the worldwide endorsement of the idea of education for global citizenship which has been enthusiastically supported by national governments politicians and policy makers across different nations Increasingly the educational institutions feel under pressure to respond to globalization forces by preparing students to engage competitively and successfully with this new realm lest their nations be left in the dust What is the role of international schools in implementing the idea of education for global citizenship How do these schools create a culturally unbiased global curriculum when the adopted models have been developed by Western societies and at the very least are replete with Western cultural values traditions and biases This collection of essays attempts to grapple with these complex issues while highlighting that culture and politics closely intertwine with schooling and curriculum as parents administrators teachers and students of different backgrounds and interests negotiate definitions of self and each other to construct knowledge in particular contexts The goal is to examine the complexity of factors that drive the global demand for education for global citizenship and de construct the contested nature of global citizenship by examining how the phenomenon is understood interpreted and modified in different cultural settings The authors provide not only a thick description of their cases but also a critical assessment of various attempts to initiate and implement educational reforms aimed at the development of globally minded citizens in various national settings **Transform Your Math Class Using Asset-Based Teaching for Grades**

6-12 Michael D. Steele,Joleigh Honey,2024-07-19 Foster a love of mathematics by creating a more inclusive and empowering learning environment through asset based teaching An asset based perspective on math education means starting with what students already know instead of focusing on what's missing This approach elevates student thinking and reasoning skills In this way educators acknowledge that all students bring prior experiences strengths talents and resources to the learning process and can contribute meaningfully in an authentic learning environment *Transform Your Math Class Using Asset Based*

Teaching for Grades 6-12 provides insight into asset-based perspectives in mathematics education to create an environment where all students feel valued and capable of being doers of mathematics. In the book, Michael Steele and Joleigh Honey highlight the importance of using language instructional routines and systemic structure that positively impact student engagement, their math identity, and ultimately their outcomes. Providing a wealth of knowledge and practical strategies that can be used to transform math classrooms into inclusive, supportive, and empowering learning environments, this book introduces an asset-based perspective that focuses on students' strengths, assets, and potential to learn mathematics. It includes a variety of frameworks and tools that teachers can use to build and grow their sense of asset-based perspectives. Offers strategies for promoting a growth mindset in mathematics, encouraging productive struggle in math, and promoting equitable math instruction. Supports teachers in reflecting on their decisions, self-awareness, and self-management. Includes a companion online study guide to support teachers individually or as part of a professional learning community. Adopting asset-based perspectives is about movement over time, not about flipping a switch. This book paves the path for an asset-based journey that ultimately helps to transform our math classrooms and advance all students' learning and development.

Using Children's Literature to Teach Problem Solving in Math Jeanne White, 2013-11-12. Learn how to use children's literature to engage students in mathematical problem solving.
