The Architect, 1884 **Proceedings of the ACSA Annual Meeting** Association of Collegiate Schools of Architecture, 1999 **Cognitive Risk** James Bone, Jessie H Lee, 2023-04-18

Cognitive Risk is a book about the least understood but most pervasive risk to mankind human decision making Cognitive risks are subconscious and unconscious influence factors on human decision making heuristics and biases To understand the scope of cognitive risk we look at case studies corporate and organizational failure and the science that explains why we systemically make errors in judgment and repeat the same errors The book takes a multidisciplinary and pedestrian stroll through behavioral science with a light touch using stories to explain why we consistently make cognitive errors that not only increase risks but also simultaneously fail to recognize these errors in ourselves or our organizations This science has deep roots in organizational behavior psychology human factors cognitive science and behavioral science all influenced by classic philosophers and enabled through advanced analytics and artificial intelligence The point of the book is simple Humans persist with bounded rationality but as the speed of information data money and life in general accelerates we will need the right tools to not only keep pace but to survive and thrive In light of all these factors that complicate risk the book offers a foundational solution A cognitive risk framework for enterprise risk management and cyber security There are five pillars in a cognitive risk framework with five levels of maturity yet there is no universally prescribed maturity level It is more a journey of different paths Each organization will pursue its own path but the goal is the same to minimize the errors that could have been avoided We explain why risks are hard to discuss and why we systematically ignore the aggregation of these risks hidden in collective decision making in an organization The cognitive risk framework is a framework designed to explore the two most complex risks organizations face uncertainty and decision making under uncertainty The first pillar is

cognitive governance which is a structured approach for institutionalizing rational decision making across the enterprise Each pillar is complimentary and builds on the next in a succession of continuous learning There is no endpoint because the pillars evolve with technology Enterprise risk is a team effort in risk intelligence grounded in a framework for good decision making We close with a call to become designers of risk solutions enabled by the right technology and nurtured by collaboration We hope you enjoy the book with this context Diffraction New Materialisms Annouchka Bayley, JJ

Chan,2023-08-05 This edited book considers the vital position of artistic research in the landscapes and ecosystems of new materialism s and post humanism s in and for higher education The book aims to satisfy an urgent desire for change in the ways we link artistic and critical research practices asking what new ways of thinking and creating for twenty first century artistic and educational contexts we need in order to address the kinds of global complexities we face Organised around five key themes including fictioning reading embodying inhabiting and folding the book acts as an entry point for academics artists and scholar practitioners to participate in the shaping of new forms of artistic research and practice that are relevant participatory and that urgently address the kinds of complex issues emergent in our twenty first century context In doing so the book makes a key contribution to the development of emerging inter and transdisciplinary artistic research practices across a range of fields responding to the question what kinds of research and practice worlds do we wish to create in times of urgency crisis and complexity Information Materials Manuel Kretzer,2016-11-03 This book considers the potential of new smart materials and their use in architecture It begins with an overview of current global tendencies technological demographic and socio anthropological and their relevance for architectural design Expanding upon approaches for flexible design solutions to address change and uncertainty Dr Kretzer begins by exploring adaptive architecture and proceeds to introduce the topic of information materials which encompasses smart and functional materials their current usage and their potential for the creation of future spaces The second chapter provides a comprehensive overview of architectural materials past and present split into the topics natural industrial synthetic digital and information materials Chapter three introduces an educational approach for the mediation of information material usage in design courses and student workshops The final section provides detailed information on a range of emerging material phenomena including aerogels bioluminescence bio plastics dye sensitized solar cells electroluminescent displays electroactive polymers soft robotics and thermochromics Each section explains its respective history working principles fabrication and potential usage in architecture and design and provides hands on tutorials on how to self produce these materials and displays class tested experimental installations The book concludes with an outlook into the domain of synthetic biology and the prospects of a living architecture It is ideal for students of structural materials engineering architecture and urban planning professionals working these in areas as well as materials science engineering and architecture educators The Academy ,1891 *The Mind of Leonardo* Paolo
