American Expansionism

(pages 342–344)

Why did Americans support imperialism?

In 1893, **Queen Liliuokalani** of Hawaii gave up her throne. Hawaii was about to be taken over by the United States.

By the 1880s, many American leaders thought the United States should establish colonies overseas. This idea was called **imperialism**—the policy in which stronger nations extend economic, political or military control over weaker territories. European countries had competed for territory all over the world. Most Americans gradually accepted the idea of overseas expansion.

Three factors fueled American imperialism: desire for military strength, thirst for new markets, and a belief in the superiority of American culture.

Admiral **Alfred T. Mahan** of the U.S. Navy supported growing American naval power so the U.S. could compete with other nations. The U.S. built such modern battleships as the *Maine* and the *Oregon*. The new ships made the U.S. the world's largest naval power.

By the late 1800s, *technology* had changed American farms and factories. They produced more than Americans could consume. So the U.S. needed foreign trade. American businesses needed markets for their products and raw materials for their factories.

Winkler, 1998-12-15 **A Citizen's Guide to American Foreign Policy** David Patrick Houghton, 2013-11-20 American foreign policy often looks like a trail of man made debris and disaster Of course the explanations for many poorly made decisions are rather complex In this brief and cogent analysis Houghton shows us that understanding American foreign policy often comes down to recognizing the cognitive limitations of the decision makers which affects the foreign policy process Then there is the nature of the decisions themselves Quite a few decisions in American foreign policy involve tragic choices where leaders are effectively confronted with a series of progressively bad or uncomfortable options And it is equally clear that some policies are not the product of any one individual's preferences but emerge as a consequence of the way in which complex modern governments with large bureaucracies operate Written with the interested layperson in mind as well as students of international affairs this Citizen's Guide to American Foreign Policy

asks questions like Why do presidents so often do things which seem to be directly against the national interests of the United States not just in retrospect but even at the time Why do there seem to be so many fiascoes in US foreign policy Why does Congress sometimes tie the hands of the president in foreign affairs Why do presidents seem to respond more to opinion polls or to what s on CNN and Fox News than they do to the core interests of the United States Houghton s overview helps us see past the partisan in fighting that too often obscures the central issues in foreign affairs This is vital required reading for all readers who wish to better understand America s involvement in the world The Latin American Revolutionary

Movement Marc Becker,2023-07-31 This volume collects the proceedings of the First Latin American Communist Conference organized in Buenos Aires Argentina in June 1929 by the South American Secretariat of the Moscow based Communist International Comintern The Conference was the first and in some ways only opportunity that communists in Latin America had to engage in a broad discussion of the most important problems and challenges that they faced The topics that the assembled delegates addressed including militarism anti imperialism trade union issues and racial discrimination were all central to the question of how to organise a strong revolutionary movement This major documentary collection of the Latin American Communist movement newly translated into English and with a substantial introduction remains surprisingly relevant to our world today With an introduction by Victor Jelfets and Lazar Jelfets **America Pathways to the Present**
