

## SELF REFLECTION PAPER

The goal of this paper is to have the student summarize and synthesize what they have gained from the field placement experience and the concurrent coursework. Students are encouraged to formulate a personal statement that represents their professional development and professional philosophy at this time. Students are to use the statements below as a guide to structuring their statement. However, students need not feel limited to these suggested guidelines and may expound on their experiences and professional development, as they deem appropriate. Length of the summary is not as important as conveying the information. Each student's statement will be very different depending upon their philosophical perspective, the depth of their learning and personal writing styles.

1. How have your professional goals changed from your initial field application statement? What have been the strongest influences for these changes?
2. Define generalist social work practice as you understand it. How were your field experiences congruent or not congruent with the overall mission of the social work profession and generalist practice? How well do your personal attitudes, values, behavior and ethical standards match with the values and principles of the social work profession?
3. Explain diversity in your own terms. What experiences have you had in your field placement that dealt with diversity? How has your understanding of the concept of diversity changed in the past year? How competent do you feel in dealing with all facets of diversity?
4. Define, describe and explain a client-related situation in which you made use of a strengths based approach. Indicate if circumstances involved an assessment or a treatment method.
5. Explain a situation in which agency policy either hindered or enhanced your ability to provide services. Be certain to explain the policy and then relate the circumstance you experienced.
6. Describe your own approach to practice at this time. What philosophical basis do you work from? What intervention methods work best for your individual style and your knowledge base at this point in your professional career?

*Handbook of Classroom Management* Carolyn M. Evertson, Carol S.

Weinstein, 2013-10-31 *Classroom management* is a topic of enduring concern for teachers administrators and the public It consistently ranks as the first or second most serious educational problem in the eyes of the general public and beginning teachers consistently rank it as their most pressing concern during their early teaching years Management problems continue to be a major cause of teacher burnout and job dissatisfaction Strangely despite this enduring concern on the part of educators and the public few researchers have chosen to focus on classroom management or to identify themselves with

this critical field The Handbook of Classroom Management has four primary goals 1 to clarify the term classroom management 2 to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers managerial tasks 3 to bring together disparate lines of research and encourage conversations across different areas of inquiry and 4 to promote a vigorous agenda for future research in this area To this end 47 chapters have been organized into 10 sections each chapter written by a recognized expert in that area Cutting across the sections and chapters are the following themes First positive teacher student relationships are seen as the very core of effective classroom management Second classroom management is viewed as a social and moral curriculum Third external reward and punishment strategies are not seen as optimal for promoting academic and social emotional growth and self regulated behavior Fourth to create orderly productive environments teachers must take into account student characteristics such as age developmental level race ethnicity cultural background socioeconomic status and ableness Like other research handbooks the Handbook of Classroom Management provides an indispensable reference volume for scholars teacher educators in service practitioners and the academic libraries serving these audiences It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management
