S. Department Of Commerce,National Oceanic and . . . Administration,National Weather Service,2013-07-02 The National Weather Service NWS has a number of devices for detecting severe thunderstorms Included in these are radar satellite and lightning detection networks However the most important tool for observing thunderstorms is the trained eye of the storm spotter While radar is used quite often in severe storm warnings conventional weather radar will only indicate areas and intensities of precipitation It does not give any indication of cloud formations or wind fields associated with a storm Doppler radar which is being introduced across the country will give some indication of air motions inside a storm Doppler radar though will not give these indications down to ground level It is impossible for any radar to detect every severe weather event in its coverage area and radar occasionally suggests severe weather when in fact none is present **Advanced Spotters' Field Guide** ,2009* **Haunting Bollywood** Meheli Sen,2017-03-01 Haunting Bollywood is a pioneering interdisciplinary inquiry into the supernatural in Hindi cinema that draws from literary criticism postcolonial studies queer theory history and cultural studies Hindi commercial cinema has been invested in the supernatural since its earliest days but only a small segment of these films have been adequately explored in scholarly work this book addresses this gap by focusing on some of Hindi cinema s least explored genres From Gothic ghost films of the 1950s to snake films of the 1970s and 1980s to today s globally influenced zombie and vampire films Meheli Sen delves into what the supernatural is and the varied modalities through which it raises questions of film form history modernity and gender in South Asian public cultures Arguing that the supernatural is dispersed among multiple genres and constantly in conversation with global cinematic forms she demonstrates that it is an especially malleable impulse that routinely pushes Hindi film into new formal and stylistic

territories Sen also argues that gender is a particularly accommodating stage on which the supernatural rehearses its most basic compulsions thus the interface between gender and genre provides an exceptionally productive lens into Hindi cinema s negotiation of the modern and the global Haunting Bollywood reveals that the supernatural s unruly energies continually resist containment even as they partake of and sometimes subvert Hindi cinema s most enduring pleasures from songs and stars to myth and melodrama
