Global Publics, Political Parties and Morality Arno Tausch,2025-08-26 This book provides a groundbreaking empirical study on the persistence of religious morality in an increasingly secular world Analyzing data from the 2019 2022 World Values Survey and European Values Survey it examines religious adherence and morality across 82 countries and over 400 political parties Using advanced index methodologies the study reveals where and how religious norms particularly those rooted in the Ten Commandments continue to shape social values and how this affects political party support Essential for scholars policymakers and religious communities this book challenges the notion that secularization is inevitable and explores the complex relationship between faith politics and global development In this book Arno Tausch a political scientist associated with the University of the Free State in South Africa impressively demonstrates that the Western political left would be well advised to return to the fundamental values of social democracy that are open to world religions as set out by Karl Polanyi rather than following the ideas of Michel Foucault and Judith Butler From the perspective of the Global South he radically reveals how the Western world is moving away from the ethical imperatives of world religions This is a disturbing yet highly topical issue as evidenced by the recent elections in America Werner J Patzelt Professor Emeritus of Political Systems and Comparative Politics TU Dresden MCC Brussels Visiting Professor of Research Incisive and erudite Arno Tausch s latest offering Global Publics Political Parties and Morality

New Perspectives in Partial Least Squares and Related Methods Herve Abdi, Wynne W. Chin, Vincenzo Esposito Vinzi, Giorgio Russolillo, Laura Trinchera, 2013-10-17 *New Perspectives in Partial Least Squares and Related Methods* shares original peer reviewed research from presentations during the 2012 partial least squares methods meeting PLS 2012 This was the 7th meeting in the series of PLS conferences and the first to take place in the USA PLS is an abbreviation for Partial Least Squares and is also sometimes expanded as projection to latent structures This is an approach for modeling relations between data matrices of different types of variables measured on the same set of objects The twenty two papers in this volume which include three invited contributions from our keynote speakers provide a comprehensive overview of the current state of the most advanced research related to PLS and related methods Prominent scientists from around the world took part in PLS 2012 and their

contributions covered the multiple dimensions of the partial least squares based methods. These exciting theoretical developments ranged from partial least squares regression and correlation component based path modeling to regularized regression and subspace visualization. In following the tradition of the six previous PLS meetings, these contributions also included a large variety of PLS approaches such as PLS metamodels, variable selection, sparse PLS regression, distance based PLS significance vs reliability, and non linear PLS. Finally, these contributions applied PLS methods to data originating from the traditional econometric economic data to genomics data, brain images, information systems, epidemiology, and chemical spectroscopy. Such a broad and comprehensive volume will also encourage new uses of PLS models in work by researchers and students in many fields.

The Criminology of Criminal Law William Laufer, 2017-07-05. The Criminology of Criminal Law considers the relation between criminal law and theories of crime, criminality, and justice. This book discusses a wide range of topics including the way in which white collar crime is defined, new perspectives on stranger violence, the reasons why criminologists have neglected the study of genocide, the idea of boundary crossing in the control of deviance, the relation between punishment and social solidarity, the connection between the notion of justice and modern sentencing theory, the social reaction to treason, and the association between politics and punitiveness. Contributors include Bonnie Berry, Don Gottfredson, David F. Greenberg, Marc Riedel, Jason Rourke, Kip Schlegel, Vered Vinitzky, Seroussi, Leslie T. Wilkins, Marvin E. Wolfgang, and Richard A. Wright. The Criminology of Criminal Law concludes with an analysis of the results of a study on the most cited scholars in the Advances in Criminological Theory series. This work will be beneficial to criminologists, sociologists, and scholars of legal studies. Advances in Criminological Theory is the first series exclusively dedicated to the dissemination of original work on criminological theory. It was created to overcome the neglect of theory construction and validation in existing criminological publications.
