Green,Albert R. Roberts,2008-06-23 Over the past two decades violent crime has become one of the most serious domestic problems in the United States Approximately 13 million people nearly 5% of the U S population are victims of crime every year and of that approximately one and a half million are victims of violent crime Ensuring quality of life for victims of crime is therefore a major challenge facing policy makers and mental health providers Helping Victims of Violent Crime grounds victim assistance treatments in a victim centered and strengths perspective The book explores victim assistance through systems theory the holistic notion of examining the client in his her environment and a key theoretical underpinning of social work practice The basic assumption of systems theoryis homeostasis A crime event causes a change in

homeostasis and often results in disequilibrium The victim's focus at this point is to regain equilibrium Under the systems metatheory coping crisis and attribution theories provide a good framework for victim centered intervention Stress and coping theories posit that three factors determine the state of balance perception of the event available situational support and coping mechanisms Crisis theory offers a framework to understand a victim's response to a crime The basic assumption of crisis theory asserts that when a crisis occurs people respond with a fairly predictable physical and emotional pattern The intensity and manifestation of this pattern may vary from individual to individual Finally attribution theory asserts that individuals make cognitive appraisals of a stressful situation in both positive and negative ways These appraisals are based on the individual's assertion that they can understand predict and control circumstances and result in the victim's assignment of responsibility for solving or helping with problems that have arisen from the crime event In summary these four theories can delineate a definitive model for approach to the victimization process It is from this theoretical framework that Treating Victims of Violent Crime offers assessments and interventions with a fuller understanding of the victimization recovery process The book includes analysis of victims of family violence child abuse elder abuse partner violence as well as stranger violence sexual assault homicide and terrorism

Krugman, 2013-11-26 This Handbook examines core questions still remaining in the field of child maltreatment. It addresses major challenges in child maltreatment work starting with the question of what child abuse and neglect is exactly. It then goes on to examine why maltreatment occurs and what its consequences are. Next it turns to prevention, treatment, and intervention as well as legal perspectives. The book studies the issue from the perspective of the broader international and cross-cultural human experience. Its aim is to review what is known but even more importantly to examine what remains to be known to make progress in helping abused children, their families, and their communities.

Securing Our Children's Future Gary S. Katzmann, 2004-05-13 A Brookings Institution Press and Governance Institute publication. A nation of great resources the United States is confronted all too often with headlines about shootings in schools and with the unsettling reality that homicide rates for juveniles far exceed that of other industrialized nations. The challenge of reducing youth violence has prompted a flurry of commentary, legislative activity, and scholarly studies, much of it skewed by lurid pronouncements, alarmist sentiments, and misleading categorizations. Focusing on the role of institutions in combating youth violence, this volume seeks to reflect its complex and multidimensional character. Copublished by the Governance Institute and the Brookings Institution, the book brings together a wide range of skilled professionals and academics across disciplines to focus on the coordination and implementation of youth anti-violence strategies. The work redefines the way we think institutionally about youth violence and collaborative initiatives, providing a pragmatic roadmap for constructive change. The essays constitute a new framework to guide key players in the juvenile justice system: prosecutors, the defense bar, the courts, correction, and probation departments, faith-based institutions, schools, the media, nonprofit institutions, and the private sector.
