Romantic philosophical conception of music as a radically disembodied abstract autonomous art and moreover a symbol or model if only a utopian one of a similarly autonomous and free human subject whose freedom and autonomy seemed increasingly untenable in the economic and political context of post Napoleonic Europe That is why music newly reconceived as radically abstract and autonomous plays such an important part in the philosophy of early German Romantics such as E T A Hoffmann Schelling and Schopenhauer with their growing misgivings about the very possibility of human freedom and not so much in the preceding generation of thinkers such as Kant and Hegel who still believed in the transcendently free subject of the Enlightenment For the early German Romantics music becomes a model of human freedom if freedom could exist By contrast virtuosity irredeemably moored in the perishable human body ephemeral and beholden to such base motives as making money and gaining fame is not only incompatible with music thus conceived but also threatens to expose it as an illusion in other words as irreducibly corporeal and by extension the human subject it was meant to symbolise as likewise an illusion Only with that in mind may we begin to understand the hostility of some early to mid 19th century critics to instrumental virtuosity which sometimes reached truly bizarre proportions In order to accomplish this the book looks at contemporary aesthetics and philosophy the contemporary reception of virtuosity in performance and composition and the impact of 19th century gender ideology on the reception of some leading virtuosos male and female alike
