Information Technology Security and Risk Management Stephen C. Wingreen, Amelia Samandari, 2024-05-16 Information Technology Security and Risk Management Inductive Cases for Information Security is a compilation of cases that examine recent developments and issues that are relevant to IT security managers risk assessment and management and the broader topic of IT security in the 21st century As the title indicates the cases are written and analyzed inductively which is to say that the authors allowed the cases to speak for themselves and lead where they would rather than approach the cases with presuppositions or assumptions regarding what the case should be about In other words the authors were given broad discretion to interpret a case in the most interesting and relevant manner possible any given case may be about many things depending on the perspective adopted by the reader and many different lessons may be learned The inductive approach of these cases reflects the design philosophy of the advanced IT Security and Risk Management course we teach on the topic here at the University of Canterbury where all discussions begin with the analysis of a specific case of interest and follow the most interesting and salient aspects of the case in evidence In our course the presentation analysis and discussion of a case are followed by a brief lecture to address the conceptual theoretical and scholarly dimensions arising from the case The inductive approach to teaching and learning also comes with a huge advantage the students seem to love it and often express their appreciation for a fresh and engaging approach to learning the sometimes highly technical content of an IT security course As instructors we are also grateful for the break in the typical scripted chalk and talk of a university lecture afforded by the spontaneity of the inductive approach We were motivated to prepare this text because there seems to be no other book of cases dedicated to the topic of IT security and risk management and because of our own success and satisfaction with inductive teaching and learning We believe this book would be useful either for an inductive case based course like our own or as a body of cases to be discussed in a more traditional course with a deductive approach There are abstracts and keywords for each case which would help instructors select cases for discussions on specific topics and PowerPoint slides are available as a guide for discussion about a given case

Overvåkingskapitalismens tidsalder Shoshana Zuboff,2021-03-30 Med sine gratis tjenester har

giganter som Google og Facebook gitt oss et tilbud vi ikke kunne takke nei til. Til gjengjeld forsyner de seg med enorme mengder data om vår oppførsel og preferanser som de ganske uforstyrret selger videre til høystbydende. Det er dette Shoshana Zuboff kaller overvåkingskapitalisme, et fenomen som truer med omforme samfunnet like mye som den industrielle revolusjonen gjorde på 1800-tallet. I overvåkingskapitalismens tid er vi ikke bare konsumenter vi utgjør selve varen. Den skjulte og stadig mer sofistikerte bruken av dataene om oss bidrar ikke bare til å gi oss skreddersydd innhold og reklame. Den er blitt et verktøy til forutsi og påvirke vår atferd både som kunder, borgere og som velgere. Og den utgjør en mektig trussel mot selve demokratiet som vår personlige frihet. Shoshana Zuboff er filosof, sosialpsykolog og professor emerita ved Harvard Business School. Hennes tre tidligere bøker har alle påvirket til ny forståelse av hvordan teknologien påvirker mennesket.
