EV - Electric Vehicles Come Home Dale Stubbart, In my first book on Electric Cars I covered those which were available in the US. In my new book I decided to cover the world. I also venture into Electric Planes and EVTOLS Electric Vertical Takeoff and Landing machines. Even though EVs are very interesting you might get bored after the 100th or so. To relieve your boredom I inserted stories about my visits from a couple of outer space aliens who are very interested in Electric Cars. Who says you can't mix research books with sci fi and humor. I start with the most popular EVs. I cover many parts of the globe. And I cover lesser known Electric cars. Some places around the world don't have good roads or the roads are too crowded. There electric motorcycles rickshaws and other vehicles are more popular than electric cars. And did you know that there's an electric skateboard. Electric Cars come in several models Sedans SUVs Crossovers Hatchbacks etc. There are even little electric bubble cars. And there's a Amphibious E Tricycle Camper. Now is a good time to get into an EV. there's availability. You'll get good range. And you'll save money on gas and maintenance. Besides bans on ICE vehicles internal combustion engine petrol powered cars are coming. Maybe not tomorrow but soon. And supermost of all owning an EV is cool and the wave of the future. And you want to get into the action now because you want to ride the crest of the wave. Some people are still worried about what happens if the battery dies. I cover that. Good news not a problem. I also cover converting your car to an EV or rather hiring someone to do that for you. and EV Rentals. I conclude the book with what it would take to own an EV Dealership. My EV choices and statements by World Leaders on EVs. I evaluate the more popular cars and provide a blank evaluation form so you can make your own evaluations. This book is packed with information but I keep it light so you won't get bored. Actually that's not true. I kept it light so that I wouldn't get bored
