Smart Car Mitsubishi and Suzuki **The North American Auto Industry since NAFTA** Greig Mordue, Dimitry Anastakis, 2024-10-01 The auto sector is North America's most iconic of industries. Since the North American Free Trade Agreement came into existence in 1994, the sector has undergone tremendous change, escalating concerns around climate change, advances in electric and automated vehicles, deindustrialization, reindustrialization, and the rise of low-cost locations as hubs for manufacturing. The North American Auto Industry since NAFTA examines the issues that have preoccupied the development of policy associated with the manufacture of automobiles in North America. The collection addresses the punctuations that have afflicted the industry since NAFTA's implementation, as well as the slower incremental evolutions that have also occurred. Several aspects of automobility and the industry are explored, including but not limited to the Canadian, American, and Mexican automotive sectors and their evolution and interaction under evolving trade regimes. The book analyses issues surrounding labour, technology, trade policy, regional development, the environment, and broader societal impacts of the automobile. It also draws on the expertise of a wide cross-section of industry experts and scholars to provide readers with a deeper understanding of the automotive industry and its central role in North America's economic, business, and political landscape.

The Carbon Buster's Home Energy Handbook Godo Stoyke, 2006-11-01 Most people are unaware that environmental problems such as climate change can be easily avoided at a profit through the intelligent application of appropriate technology. The Carbon Buster's Home Energy Handbook describes how to achieve this goal in the residential field. The first book in North America to provide a detailed carbon accounting of a family's carbon emissions and how to reduce them, it systematically analyzes energy costs and evaluates which measures yield the highest returns for the environment and the pocketbook. It provides answers to questions such as: Which measure is more effective: putting solar panels on your roof or buying a hybrid car? Where do I need to invest first: in high-efficiency shower heads or solar tubes? Is a 500-fridge that uses 800 kWh of power per year a good buy? The book allows individuals to quickly and accurately assess which products are a good deal and which aren't. It systematically analyzes residential carbon emissions and energy costs and prioritizes solutions based on highest carbon reductions and monetary returns, yielding results that are often surprising. The book enables readers to dramatically reduce their carbon emissions far below the levels targeted under the Kyoto Protocol. At the same time, readers implementing the recommendations will save an average of 15,000 in energy costs over the next five years.

Sustainability, Energy, and Alternative Fuels 2007 National Research Council (U.S.). Transportation Research Board, 2007 TRR no 2017 includes 8 papers that explore policy making for sustainability in transport indicators for comprehensive and sustainable transport planning, measuring sustainable accessibility, energy use of plug-in hybrid electric vehicles, attitudes of diesel and hybrid new car buyers, greenhouse gas emissions of the U.S. transportation sector, oil independence, and macroeconomic effects of climate policies on road transport.
