Power Machines N5 November 2014:

Fueling Freedom Stephen Moore, Kathleen Hartnett White, 2016-05-23 Fossil fuel energy is the lifeblood of the modern world. Before the Industrial Revolution, humanity depended on burning wood and candle wax. But with the ability to harness the energy in oil and other fossil fuels, quality of life and capacity for progress increased exponentially. Thanks to incredible innovations in the energy industry, fossil fuels are as promising, safe, and clean an energy resource as has ever existed in history. Yet highly politicized climate policies are pushing a grand scale shift to unreliable, impractical, incredibly expensive, and far less efficient energy sources. Today, fossil fuel has become such a dirty word that even fossil fuel companies feel compelled to apologize for their products. In *Fueling Freedom*, energy experts Stephen Moore and Kathleen Hartnett White make an unapologetic case for fossil fuels, turning around progressives' protestations to prove that if fossil fuel energy is supplanted by green alternatives for political reasons, humanity will take a giant step backwards and the planet will be less safe, less clean, and less free.

Nanoweapons Louis A. Del Monte, 2017 Nanoweapons just might render humanity extinct in the near future, a notion that is frightening and shocking but potentially true. In *Nanoweapons*, Louis A. Del Monte describes the most deadly generation of military weapons the world has ever encountered. With dimensions one thousandth the diameter of a single strand of human hair, this technology threatens to eradicate humanity as it incites world governments to compete in the deadliest arms race ever. In his insightful and prescient account of this risky and radical technology, Del Monte predicts that nanoweapons will dominate the battlefield of the future and will help determine the superpowers of the twenty-first century. He traces the emergence of nanotechnology, discusses the current development of nanoweapons such as the mini nuke, which weighs five pounds and carries the power of one hundred tons of TNT, and offers concrete recommendations founded in historical precedent for controlling their proliferation and avoiding human annihilation. Most critically, *Nanoweapons* addresses the question: Will it be possible to develop, deploy, and use nanoweapons in warfare without rendering humanity extinct?

Melanin Is Worth More Than Gold Nnamdi Azikiwe,2020-05-16 Who would

have thought preparations for a March 2014 Sacred Libation Ceremony honoring one hundred forty eight African American women lynched in America would result in the observation melanin is worth more than gold Dr Frances Cress Welsing first told us the chemical melanin is produced through a process known as melanogenesis upon introduction of the chemical tyrosine to the enzyme tyrosinase Melanin is found in such diverse places as bird feathers animal fur reptile scales microorganisms cephalopod ink mushrooms and even fossils Additionally melanin is found in the hair skin and eyes of people Melanin is subjected to intense scientific scrutiny Nevertheless the highly educated people studying it had no idea melanin is worth more than gold In June 2014 a post to the Keyamsha the Awakening blog openly declared melanin was worth 353 a gram and 300 a gram more than gold Shortly afterwards hoaxers began bombarding the blog with comments claiming melanin thieves were harvesting melanin from Black people The hoax was easily falsified The hoaxers made certain to never mention the company selling melanin extracted from the ink of *sepia officinalis* the common cuttlefish During the intervening years the melanin thieves hoaxers persisted in their efforts In March 2017 the melanin thieves hoaxers launched a Melanin Twitter bomb involving the dollar value of melanin after publicity of black women and girls missing in Washington D C was released Their actions exposed a frailty in their psyche They also reveal it is possible to wipe out false information involving melanin and take the melanin challenged inferiority complex aka racism white supremacy along for the ride It then became clear the time had come to enter the fray and dispel the myths about melanin This book completely obliterates the false narrative of melanin Perceiving facts from a melanin centered perspective bestows upon us an expanded awareness of the world and our place in it It helps provide the average person a means to immerse themselves in melaninology and emerge a melaninologist Essentially we get to know ourselves To date no other path for the public to independently verify or falsify outlandish claims regarding melanin being worth more than gold on their own without any guru to guide them have been made available At this writing melanin is worth over 395 a gram more than gold In ancient Kemet misnomered Egypt such words were known as hekau or words of power with the ability to heal For nearly one hundred years since August 13 1920 melanin put the B in R B G and the Black in Red Black and Green as the flag of Africans at home and abroad Those are hekau also Our Blood Our Melanin and Africa unites us More hekau The Afro official currency of the United States of Africa also known as the African Union is worth 2 22 We are swathed in hekau to such an extent Mchakato Wa Uponyaji Swahili for the process of healing has begun All of which indicates we are living in a new era the era when all the generations of man can be called blessed on a planet that works for everyone This era demands we convene the Ubuntu Convention That plebiscite sets the stage for drafting the Ubuntu Declaration In emulating the success of the August 1920 Universal Negro Improvement Association convention we deliberately create the world where we intend to live The revival of the U N I A with 12 million dues paying card carrying members positions the organization to have a treasury flush with over 400 million liquid All of which represents a quantum shift in awareness perception and power underway as you read this Through our own actions we
