SECTION A

QUESTION 1

**INSTRUCTIONS TO LEARNERS – THIS IS AN INDIVIDUAL TASK.
THE TASK MUST BE DONE IN CLASS UNDER
CONTROLLED CONDITIONS.**

Background

Every family has observable characteristics, or traits, that are passed on from parents to their children. We can categorize these traits in two different ways: as genotype and phenotype. A person's **genotype** is the set of genes that he/she carries (what their DNA 'says'). The **phenotype** is the observable characteristics (what we can see). Different versions of the same gene are called **alleles**. To keep things simple, we give the genotype a two-letter code. You will be given codes to use in this exercise.

Each letter of the two-letter code is an allele. Remember that you get two copies of each gene: one from mom and one from dad.

You have two 'aliens' – a female and a male.
