This pack combines a key text in macroeconomics with an

invaluable accompanying manual Consisting of the third edition of Foundations of Modern Macroeconomics and Foundations

of Modern Macroeconomics Exercise and Solutions Manual it couples together complementary titles in a great value set The

study of macroeconomics can seem a daunting project The field is complex and sometimes poorly defined and there are a

variety of competing approaches Foundations of Modern Macroeconomics is a guide book for the interested and ambitious

student Non partisan in its approach it deals with all the major topics summarising the important approaches and providing

the reader with a coherent angle on all aspects of macroeconomic thought Each chapter deals with a separate area of

macroeconomics and each contains a summary section of key points and a further reading list Using nothing more than

undergraduate mathematical skills it takes the student from basic IS LM style macro models to the state of the art literature

on Dynamic Stochastic General Equilibrium explaining the mathematical tricks used where they are first introduced

Designed to complement the third edition of Foundations of Modern Macroeconomics the Exercise and Solutions Manual

enables students to further sharpen their skills in macroeconomic formulation and solution It uses worked example models to

enable self study and to allow the reader to begin to build their own models Both fully updated and substantially revised

these new editions include brand new problems and numerical examples alongside previously uncovered and highly topical

subjects such as dynamic programming competitive risk sharing equilibria and the New Keynesian DSGE approach
