The Conflict Resolution Toolbox Gary T. Furlong, 2010-03-22 In real life conflict resolution situations one size does not fit all Just as a mechanic does not fix every car with the same tool the conflict resolution practitioner cannot hope to resolve every dispute using the same technique Practitioners need to be comfortable with a wide variety of tools to diagnose different problems in vastly different circumstances with different people and resolve these conflicts effectively The Conflict Resolution Toolbox gives you all the tools you need eight different models for dealing with the many conflict situations you encounter in your practice This book bridges the gap between theory and practice and goes beyond just one single model to present a complete toolbox a range of models that can be used to analyze diagnose and resolve conflict in any situation It shows mediators negotiators managers and anyone needing to resolve conflict how to simply and effectively understand and assess the situations of conflict they face And it goes a step further offering specific practical guidance on how to intervene to resolve the conflict successfully Each model provides a different and potentially useful angle on the problem and includes worksheets and a step by step process to guide the reader in applying the tools Offers eight models to help you understand the root causes of any conflict Explains each model's focus what kind of situations it can be useful in and most importantly what interventions are likely to help Provides you with clear direction on what specific actions to choose to resolve a particular type of conflict effectively Features a detailed case study throughout the book to which each model is applied Additional examples and case studies unique to each chapter give the reader a further chance to see the models in action Includes practical tools and worksheets that you can use in working with these models in your practice The Conflict Resolution Toolbox equips any practitioner to resolve a wide range of conflicts Mediators negotiators lawyers managers and supervisors insurance adjusters social workers human resource and labour relations specialists and others will have all the tools they need for successful conflict resolution

Conflict Management Simplified John-Clinton Nsengiyumva, 2016-09-21 One of the most important things that hardly miss whenever continued relationship between two or more persons exists is conflict Yet many people find themselves unprepared to handle conflicts since they have cultivated an attitude that considers conflict as a bad omen that ought not to

exist and therefore should not even be anticipated However conflict is not bad How conflict is managed determines the eventual outcome The eventual outcome could be good or bad Unfortunately due to lack of proper conflict management skills most conflicts end up delivering bad outcome To equip you with essential skills to manage conflict be it at the individual level family level group level organizational level national or international level this book is divided into four major parts part I part II part III and part IV Part I of this book delves into the nature of conflicts so that you are able to know and identify the various forms of conflict how they arise and what motivates them It begins by defining what conflict is and goes further to highlight key elements of conflict various kinds of conflict various causes of conflicts and rests with informing you why conflict is healthy Both part II and part III dwell on the actual conflict management Part II focuses on conflict assessment whereby it equips you with necessary skills to assess the nature of a given conflict the conflicting parties and key stakeholders It goes further to show you how to carry out conflict analysis process design for conflict resolution process and write a report on your findings of the assessment Part III equips you with the necessary skills required to carry out successful conflict resolution It highlights two key processes involved in conflict resolution consensus building and negotiation It shows you how these two processes are interrelated and the various approaches to carry them out in order to reach a possible settlement Part IV gives special emphasis on certain other kinds of conflicts that may not necessarily involve the entire process as indicated in part II and part III which may require a more specialized approach and attention These conflicts include workplace conflict and marriage conflict This book is definitely a good resource for those who intend to use it as a way of resolving conflicts in their personal lives those who would like to specialize in conflict management those already practicing conflict management and thus would like to gain further knowledge and skills or simply to refresh them and lastly to the general public that needs to more aware about the dynamics of conflicts
