Newman, 2012-05-29 Explore the foundations and modern applications of Galois theory Galois theory is widely regarded as one of the most elegant areas of mathematics A Classical Introduction to Galois Theory develops the topic from a historical perspective with an emphasis on the solvability of polynomials by radicals The book provides a gradual transition from the computational methods typical of early literature on the subject to the more abstract approach that characterizes most contemporary expositions The author provides an easily accessible presentation of fundamental notions such as roots of unity minimal polynomials primitive elements radical extensions fixed fields groups of automorphisms and solvable series As a result their role in modern treatments of Galois theory is clearly illuminated for readers Classical theorems by Abel Galois Gauss Kronecker Lagrange and Ruffini are presented and the power of Galois theory as both a theoretical and computational tool is illustrated through A study of the solvability of polynomials of prime degree Development of the theory of periods of roots of unity Derivation of the classical formulas for solving general quadratic cubic and quartic polynomials by radicals Throughout the book key theorems are proved in two ways once using a classical approach and then again utilizing modern methods Numerous worked examples showcase the discussed techniques and background material on groups and fields is provided supplying readers with a self-contained discussion of the topic A Classical Introduction to Galois Theory is an excellent resource for courses on abstract algebra at the upper undergraduate level The book is also appealing to anyone interested in understanding the origins of Galois theory why it was created and how it has evolved into the discipline it is today **Glimpses of Algebra and Geometry** Gabor Toth, 2006-04-06 Previous edition sold 2000 copies in 3 years Explores the subtle connections between Number Theory Classical Geometry and Modern

Research and Innovation 2019 Universidade do Minho, 2021-11-08 Research and innovation are two pillars that come together when universities are at stake The expansion of the frontiers of human knowledge in all areas and disciplines is an irrefutable commitment of higher education institutions Together with public and private entities they are also committed to promoting knowledge transfer to society and the economy in the form of new ideas new products and new processes Universities are supposed to transform ideas into value for society To achieve these goals higher education institutions have to assure their human resources are highly qualified that they have an adequate atmosphere that research is of high quality and finally that adequate interactions take place At UMinho we have a clear strategy to be an open and permanent space for knowledge production and furtherance of nationally and internationally relevant innovation across different social and economic sectors For many years UMinho has adopted the principles of open access and open science We aim at carrying out our scientific activity and the dissemination of the corresponding results transparently and collaboratively this implies that researchers citizens policymakers state agencies companies and third sector organizations work in close cooperation facing research and innovation processes We believe this

is the shorter way to trigger smart and sustainable growth and qualified job creation At UMinho we encourage the coupling between research and education Our goal is to expand research opportunities and to give our students occasions to experience vibrant research environments ensuring that learning goes beyond the common routines Joining research and learning processes provides both undergraduate and postgraduate students with opportunities to own their learning process We believe that research experience has a role to play in improving students motivation for learning in the pursuit of their interests Doing better science occurs when we make it both more sensitive to the needs of society and also more efficient in what concerns the allocated resources It is also a question of accountability This is fundamental for reinforcing society awareness about our contributions to human and social development Following the 2018 publication we present here the 2019 edition of Research and Innovation a series that draws on the outcomes of the activity of the UMinho research and innovation ecosystem This comprehensive volume gives particular emphasis to the Research Units outcomes namely in terms of funding research projects papers and the most important achievements the activity of the Interface Units and Collaborative Laboratories in which UMinho participates is also reported through their activities and institutional projects making evident their importance for the continuous growth of our Institution our region and our country Rui Vieira de Castro Rector
