Dale, Chip Weems, 2005 This book is a reference which addresses the many settings that geriatric care managers find themselves in such as hospitals long term care facilities and assisted living and rehabilitation facilities It also includes case studies and sample forms     **A Gateway to Higher Mathematics** Jason H. Goodfriend, 2005 A Gateway to Higher Mathematics integrates the process of teaching students how to do proofs into the framework of displaying the development of the real number system The text eases the students into learning how to construct proofs while preparing students how to cope with the type of proofs encountered in the higher level courses of abstract algebra analysis and number theory After using this text the students will not only know how to read and construct proofs they will understand much about the basic building blocks of mathematics The text is designed so that the professor can choose the topics to be emphasized while leaving the remainder as a reference for the students     Java 5 Illuminated Julie Anderson, Hervé Franceschi, 2005 With a variety of interactive learning features and user friendly pedagogy Java 5 Illuminated provides a comprehensive introduction to programming using the most current version of the Java language Java 5 In addition to providing all of the material necessary for a complete introductory course in Java programming the book also features flexible coverage of other topics of interest including Graphical User Interfaces data structures file input and output and applets Object Oriented Programming concepts are developed progressively and reinforced through numerous Programming Activities allowing students to fully understand and implement both basic and sophisticated techniques at a pace which is neither too fast nor too slow OO concepts are blended appropriately with fundamental programming techniques including accumulation counting finding maximum and minimum values and using flag and toggle variables and supplemented with coverage of sound software engineering practices Distinguishing this text from other introductory Java books is the authors extensive use of an active learning approach to presenting the material through abundant use of graphics visualization exercises animations numerous full and partial program examples group projects and best practices
