Nature-based Solutions for Resilient Ecosystems and Societies Shalini Dhyani, Anil Kumar Gupta, Madhav Karki, 2020-07-07 Over the past few decades the frequency and severity of natural and human induced disasters have increased across Asia These disasters lead to substantial loss of life livelihoods and community assets which not only threatens the pace of socio economic development but also undo hard earned gains Extreme events and disasters such as floods droughts heat fire cyclones and tidal surges are known to be exacerbated by environmental changes including climate change land use changes and natural resource degradation Increasing climate variability and multi dimensional vulnerabilities have severely affected the social ecological and economic capacities of the people in the region who are economically speaking those with the least capacity to adapt Climatic and other environmental hazards and anthropogenic risks coupled with weak and wavering capacities

severely impact the ecosystems and Nature's Contributions to People NCP and thereby to human well-being. Long-term resilience building through disaster risk reduction and integrated adaptive climate planning therefore has become a key priority for scientists and policymakers alike. Nature-based Solutions NbS is a cost-effective approach that utilizes ecosystem and biodiversity services for disaster risk reduction and climate change adaptation while also providing a range of co-benefits like sustainable livelihoods and food, water and energy security. This book discusses the concept of Nature-based Solutions NbS both as a science and as art and elaborates on how it can be applied to develop healthy and resilient ecosystems locally, nationally, regionally and globally. The book covers illustrative methods and tools adopted for applying NbS in different countries. The authors discuss NbS applications and challenges, research trends and future insights that have wider regional and global relevance. The aspects covered include landscape restoration, ecosystem-based adaptation, ecosystem-based disaster risk reduction, ecological restoration, ecosystem-based protected areas management, green infrastructure development, nature-friendly infrastructure development in various ecosystem types, agro-climatic zones and watersheds. The book offers insights into understanding the sustainable development goals (SDGs) at the grass-roots level and can help indigenous and local communities harness ecosystem services to help achieve them. It offers a unique essential resource for researchers, students, corporations, administrators and policymakers working in the fields of the environment, geography, development, policy, planning, the natural sciences, life sciences, agriculture, health, climate change and disaster studies.

Innovations in Economic Education Mary Beth Henning, 2016-11-25. Innovations in Economic Education addresses the growing issue of financial illiteracy by showing how economics can be successfully integrated into classrooms from kindergarten through higher education. Pre-service teachers, experienced educators, curriculum leaders, parents and school administrators will find practical ideas to improve economic understanding. At the elementary level, the book provides creative ways of introducing young students to the basic concepts of economics, financial justice and social action. For higher grade levels, the book offers ideas to integrate economics into current history, civics and math curricula. The final portion of the book features recommendations by leading economic educators on how economics can play a greater role in teachers' professional development. The pedagogical tools presented in each chapter include lesson plans and practical insights and are designed to meet the NCSS C3 Framework and Common Core State Standards for Social Studies. This book is a timely and valuable resource for all educators interested in improving their students' economic literacy and financial decision-making.
