West, 2003-04-17 This book investigates the issues raised by the vast array of accounting standards and technical rules which have marked the recent history of accounting It is argued that the accounting profession is beset by an inferior and incomplete notion of quality in its work which emphasises compliance with processing rules rather than the correspondence with commercial phenomena necessary to make financial statements reliable guides for human activity The Jurist, 1858 **Power**, 1924 *Harrison's Analytical Digest of All the Reported Cases Determined in the House of Lords, the Several Courts of Common Law, in Banc and Nisi Prius, and the Court of Bankruptcy: from Michaelmas Term, 1856, to Easter Term 1843* Samuel Bealey Harrison, 1846 **Claiming Back Their Heritage** Geneviève Susemihl, 2023-10-04 This book provides a unique in depth look at three Indigenous World Heritage sites in Canada and their

use for Indigenous empowerment and community development Based on extensive ethnographic field studies and comprehensive narrative interviews it shows how the three First Nation communities presented in the case studies enforce recognition of their collective rights to preserve their cultural heritage and assert their right to political economic cultural and social self determination It also considers the prevailing universalistic discourses around World Heritage and the various ways in which they serve to either reinforce existing oppressive conditions regarding Indigenous communities and voices or provide opportunities to overcome them The book will be of interest to scholars and students working on social and cultural histories histories of colonialism and in heritage and museum studies

Brimblecombe, W.T. Sturges, 2002-10-31 Acid rain photochemistry long range transport of pollutants greenhouse gas emissions and aerosols have dominated tropospheric air pollution for the last 30 years of the 20th century At the start of the 21st century acid rain is subject to planned improvement in Europe and North America but is still a growing problem in Asia Tropospheric ozone is understood much better but the problem is still with us and desirable levels are difficult to achieve over continental Europe The heterogeneous chemistry that is responsible for ozone depletion in the stratosphere is now reasonably clear but there is on going interest in the sources and sinks of CFC chlorofluorocarbon replacements in the troposphere There is also increasing interest in indoor air quality and the origin and health implications of atmospheric particles Perhaps most important on a global perspective intensive research has not yet determined the relationship between greenhouse gases aerosols and surface temperature The climactic implications of these are now more urgent than ever This book the first in the Developments in Environmental Science series consists of a collection of authoritative reviews and essays on the science and application of air pollution research at the start of this new century
