Freedom and Law Randi Rashkover, 2011 By contrast Freedom and Law argues that only in an account of revelatory law can divine freedom and human freedom be thought of without contradiction The first part analyzes the logic of exceptionalism In the second part the author argues that one cannot invoke a doctrine of election without rigorous scrutiny of texts that portray an electing God and an elected people Once we scrutinize these texts the character of freedom and law within the divine human relationship shows itself to be different from that found in exceptionalist logics The third and final part examines the impact of the logic of the law on Jewish Christian apologetics Rather than require that one defend one's position to a nonbeliever this logic situates all epistemological justification within the order or freedom of God **The**

Elite Networks Vuk Vukovi?,2024-04-23 *Elite Networks* presents a new explanatory factor behind the persistence of income inequality extractive political power Elite networks are informal social networks between politicians in power and top executives of politically connected firms where personal ties and long term interactions build trust and loyalty between involved actors Both groups draw benefits from these interactions politicians stay in power and corporate executives extract rents for their firms Firms reward connected executives with higher salaries thus widening the dispersion of earnings in society In *Elite Networks* Vuk Vukovi offers a different perspective on the long run origins of inequality Calling upon historical arguments and direct empirical evidence Vukovi argues that inequality is not an artifact of a particular economic system but a man made phenomenon rooted deeply within the often violent quest for political power Further he theoretically and empirically establishes the impact elite networks have on higher inequality Offering a unique contribution to the field this book argues that to lower inequality and prevent incentives of elite network formation we must first and foremost lower centralized political power and re empower the citizens and the community by rebuilding trust and relying on the democratic trial and error mechanism

Disruption Michael De Groot,2024-03-15

In *Disruption* Michael De Groot argues that the global economic upheaval of the 1970s was decisive in ending the Cold War Both the West and the Soviet bloc struggled with the slowdown of economic growth chaos in the international monetary system inflation shocks in the commodities markets and the emergence of offshore financial markets The superpowers had previously disseminated resources to their allies to enhance their own national security but the disappearance of postwar conditions during the 1970s forced Washington and Moscow to choose between promoting their own economic interests and supporting their partners in Europe and Asia De Groot shows that new unexpected macroeconomic imbalances in global capitalism sustained the West during the following decade Rather than a creditor nation and net exporter as it had been during the postwar period the United States became a net importer of capital and goods during the 1980s that helped fund public spending stimulated economic activity and lubricated the private sector The United States could now live beyond its means and continue waging the Cold War and its allies benefited from access to the booming US market and the strengthened US military umbrella As *Disruption* demonstrates a new symbiotic economic architecture powered the West but the Eastern European regimes increasingly became a burden to the Soviet Union They were drowning in debt and the Kremlin no longer had the resources to rescue them
