Ppe Paper May 2015:

Preventing Fatal Incidents in School and Youth Group Camps and Excursions Andrew Brookes, 2018-05-07 This book approaches the prevention of fatal incidents in outdoor education and related fields through detailed study of past tragedies. Although safety in many fields is built on accumulated lessons from past incidents, tragedies on school or youth group camps and excursions are so infrequent and so widely scattered that knowledge from previous incidents can elude those who would benefit. Nevertheless, the emergence of unlearned lessons from the past weighs heavily when those affected by a tragedy judge whether an incident should have been prevented. This book provides a foundation for a detailed and comprehensive understanding of fatality prevention in outdoor education and in youth camps and excursions. It compiles, examines, and analyses information on fatal incidents that have occurred over many decades involving many kinds of groups and endeavours from around the globe. No previous work has attempted this task. WeBIOPATR2015 THE FIFTH

Milena Jovašević-Stojanović, Alena Bartonova, 2017-10-10 Palynology and Vegetation History Valentí Rull, Encarni Montoya, Thomas Giesecke, Jesse L. Morris, 2019-01-11 This Research Topic commemorates the centenary of the first quantitative pollen diagram by Lennart von Post, the founder of paleoecological palynology. The main aim is to provide a thorough view of the use of palynology in aspects such as the reconstruction of Quaternary vegetation and environmental changes, the role of natural and anthropogenic drivers in the development of the Quaternary vegetation, the shaping of present-day ecological and biogeographical patterns, the potential application of this knowledge in biodiversity conservation and landscape restoration, and the development of new methods of pollen analysis and data management. The Research Topic is subdivided into four main conceptual parts: namely, 1. modern analog studies, 2. land cover estimates from pollen data, 3. vegetation dynamics reconstructions from Europe, North and South America, Africa, and Oceania, and 4. large-scale reviews and meta-analyses. Hopefully, this Research Topic will serve to appraise the state of the art of modern palynology and highlight the usefulness of this discipline in long-term ecological research. **Child Abuse and Neglect in Uganda** David
