**Basic Statistics for Risk Management in Banks and Financial Institutions** Arindam Bandyopadhyay, 2022-03-08 The book provides an engaging account of theoretical empirical and practical aspects of various statistical methods in measuring risks of financial institutions especially banks In this book the author demonstrates how banks can apply many

simple but effective statistical techniques to analyze risks they face in business and safeguard themselves from potential vulnerability. It covers three primary areas of banking risks: credit market and operational risk and in a uniquely intuitive step by step manner the author provides hands on details on the primary statistical tools that can be applied for financial risk measurement and management. The book lucidly introduces concepts of various well known statistical methods such as correlations, regression matrix approach, probability and distribution theorem, hypothesis testing, value at risk and Monte Carlo simulation techniques and provides a hands on estimation and interpretation of these tests in measuring risks of the financial institutions. The book strikes a fine balance between concepts and mathematics to tell a rich story of thoughtful use of statistical methods.
