Development Theory and Practice in a Changing World Pádraig Carmody, 2019-04-09 Taking a critical and historical view this text explores the theory and changing practice of international development It provides an overview of how the field has evolved and the concrete impacts of this on the ground on the lives of people in the Global South Development Theory and Practice in a Changing World covers the major theories of development such as modernisation and dependency in addition to anti development theories such as post modernism and decoloniality It examines the changing nature of immanent structural conditions of development in addition to the main attempts to steer them imminent development The book suggests that the era of development as a hegemonic idea and practice may be coming to an end at the same time as it appears to have achieved its apogee in the Sustainable Development Goals as a result of the rise of ultra nationalism around the world the increasing importance of securitisation and the existential threat posed by climate change Whether development can or should survive as a concept is interrogated in the book This book offers a fresh and updated take on the past 60 years of development and is essential reading for advanced undergraduate students in areas of development geography international studies political science economics and sociology

Save and Grow in practice: maize, rice, wheat Food and Agriculture Organization of the United Nations, 2018-06-21 FAO s best selling 2011 publication Save and Grow proposed a new paradigm of agriculture one that is both highly productive and environmentally sustainable This new book looks at the application of Save and Grow practices and technologies to production of the world s key food security crops maize rice and wheat With examples drawn from developing countries worldwide it shows how eco friendly farming systems are helping smallholder producers to boost cereal yields improve their incomes and livelihoods conserve natural resources reduce negative impacts on the environment and build resilience to climate change The book will be a valuable reference for policymakers and development practitioners guiding the transition to sustainable food and agriculture

Conservation Agriculture for Africa Amir H Kassam, Saidi Mkomwa, Theodor Friedrich, 2016-12-14 Tillage agriculture has led to widespread soil and ecosystem degradation globally This is especially so in Africa where traditional and modern tillage based agricultural practices have become unsustainable due to severe disturbance and exploitation of natural resources with negative impacts on the environment and rural livelihoods In addition agriculture in Africa today faces major challenges including increased costs of production and energy the effects of climate change and the lack of an effective paradigm for sustainable intensification especially for small and medium size holdings Africa is facing a serious challenge to food security and as a continent has not advanced towards eradicating hunger In addition the population is still growing much faster than on most other continents This pressure has led to the emergence of no till conservation agriculture as a serious alternative sustainable agriculture paradigm In Africa in recent years conservation agriculture techniques and methods have spread to many countries as greater development education and research effort are directed towards its extension and uptake This book is aimed at

agricultural researchers and scientists educationalists and agricultural service providers institutional leaders and policy makers working in the fields of sustainable agriculture and international development and also at agroecologists conservation scientists and those working on ecosystem services Handbook of Research on Methodologies for Design and Production Practices in Interior Architecture Garip, Ervin, Garip, S. Banu, 2020-11-20 Studio environments can be defined as multi dimensional integrated production spaces where basic design trainings take place and where design issues including theoretical notions such as sociological political phenomenological and other dimensions are discussed Present approaches within the literature and social media on this topic gives cause for students to evaluate their future professions over finished and pictorial products rather than ontological and processual means While there are many resources available on the present approaches of aesthetics and visuality of interior spaces there is not much research available on new design methodologies related design processes and new applied methods in interior architecture Based on different contexts these methods of design practice have the potential to enrich design processes and create multiple discussion platforms within project studios as well as other design media These different representations and narration methods for research in the context of interior architecture can be effectively used in design processes The Handbook of Research on Methodologies for Design and Production Practices in Interior Architecture proposes new design methodologies and related design processes and introduces new applied method approaches while presenting alternative methods that have been used within design studios in the field of interior architecture The chapters deal with four major sections the design process and interdisciplinary approaches then scenario development and content followed by material texture and atmosphere and concluding with new approaches to design While highlighting topics such as spatial perception design strategies architectural atmosphere and design thinking this book is of interest to architects interior designers practitioners stakeholders researchers academicians and students looking for advanced research on the new design methodologies and processes for interior architecture

Partial Stories Claire L. Wendland, 2022-04-22 *Partial Stories* takes readers to Malawi where roughly one in twenty women can expect to die of a pregnancy or childbirth complication despite decades of safe motherhood programs The stories of these mothers are told in hospitals and villages by chiefs and doctors herbalists and nurses epidemiologists and healers and competing explanations proliferate The mothers stories are used by elders for technical education and moral instruction at a coming of age ritual a district hospital s mortality review and in the reflected glow of a computer screen at an international conference After orienting readers to urban Malawi s context of therapeutic pluralism and material scarcity Claire Wendland discusses the ways various experts account for maternal death showing how their diverse explanations reflect competing visions of the past and shared concerns about social change She looks to a series of pregnancy related deaths in order to consider bodies as biosocial phenomena shaped from before birth by history and social inequality Wendland reveals an uneven therapeutic landscape that pushes experts to improvise clinically and ethically Their creative

essential and sometimes deadly improvisations ask us to reconsider the best practice dogmas of global health and transnational research as well as the nature of medical authority and expertise Wendland demonstrates how strategies of legitimation render care more dangerous and knowledge more partial than it might otherwise be *An Introduction to Global Health Delivery* Joia Mukherjee, 2022 In 2019 a child born in Japan will live to the age of 84 whereas a child born in Sierra Leone will only live until the age of 54 1 Similar disparities exist between rich and poor communities within countries 2 These differences in life expectancy are not caused by genetics biology or culture Health inequities are caused by poverty racism a lack of medical care and other social forces that influence health A critical analysis of the historical roots of this gross and systemic inequality and of the political economy that continues inequality is a fundamental part of the study of global health

Collaborative Practice for Public Health Dawne Gurbutt, 2018-04-17 Collaborative Practice for Public Health encourages individuals to consider the opportunities and impacts of working in public health as well as the gains that can be made by working collaboratively Chapters explore some of the sociological issues that underpin the practice of public health and offer valuable insights into its complexities addressing how different groups might work together effectively in the creation and delivery of public health policy The book also examines interprofessional education and collaborative working in the non profit sector and in primary care and discusses why moving out of silos is an important factor in promoting collaborative working not as a shared occasional endeavour but as the underpinning experience for practice Through examples definitions and a focus on real life situations this practical guide illustrates the different ways in which public health permeates health and social care in the UK and internationally

Gender and Practice Marcia Texler Segal, Kristy E. Kelly, Vasilikie (Vicky) Demos, 2019-11-22 This book has an Open Access chapter Throughout the volume expert practitioners situate their real world experiences in the broader intersectional framework employed by their academic colleagues offering policy makers students scholars practitioners and activists concrete examples of how and why gender is central to development

Climate Smart Agriculture Leslie Lipper, Nancy McCarthy, David Zilberman, Solomon Asfaw, Giacomo Branca, 2017-10-20 This book is open access under a CC BY NC SA 3.0 IGO license The book uses an economic lens to identify the main features of climate smart agriculture CSA its likely impact and the challenges associated with its implementation Drawing upon theory and concepts from agricultural development institutional and resource economics this book expands and formalizes the conceptual foundations of CSA Focusing on the adaptation resilience dimension of CSA the text embraces a mixture of conceptual analyses including theory empirical and policy analysis and case studies to look at adaptation and resilience through three possible avenues ex ante reduction of vulnerability increasing adaptive capacity and ex post risk coping The book is divided into three sections The first section provides conceptual framing giving an overview of the CSA concept and grounding it in core economic principles The second section is devoted to a set of case studies illustrating the economic basis of CSA in terms of reducing vulnerability increasing adaptive capacity

and ex post risk coping The final section addresses policy issues related to climate change Providing information on this new and important field in an approachable way this book helps make sense of CSA and fills intellectual and policy gaps by defining the concept and placing it within an economic decision making framework This book will be of interest to agricultural environmental and natural resource economists development economists and scholars of development studies climate change and agriculture It will also appeal to policy makers development practitioners and members of governmental and non governmental organizations interested in agriculture food security and climate change
