Laboratory Manual of Pharmacognosy Dr. Remeth J. Dias ,Mr. Vijay D. Havaladar,Dr. V. N. Jagtap,Ms. Tasleem S. Kureshi,2023-09-28 We are very pleased to put forth the revised edition of Laboratory Manual of Pharmacognosy We have incorporated all the suggestions modified it to make it easier student friendly and relevant in terms of achieving curriculum outcome We are very much thankful to all the learned teachers who have given their feedback whole heartedly We have even incorporated the changes in this manual based on the feedback given by the teachers from all the institutes Now we believe that the manual has been fulfilling the aspirations of pharmacognosy teachers and students too This manual is prepared as per PCI Education Regulations 2020 for Diploma Course in Pharmacy Each experiment is arranged sequentially such as aim practical significance relevant professional competencies relevant course outcomes competencies and skills practical outcomes relevant affective domain related outcomes minimum theoretical background requirements contents related questions and assessment scheme This manual is a sincere effort to improve the practical skills of students so that every student will understand the objective of each experiment and perform their practical s easily Theory of each experiment is given in all twenty eight experiments making the manual more interesting The manual also focuses on the extra features in morphological characters of certain crude drugs that will be helpful in identifying various varieties of crude drugs We acknowledge the help and co operation extended by various persons in bringing out this manual We are highly indebted to the authors of various books and articles mentioned in bibliography which became a major source of information for writing this manual We also thank the publishers designers and printers who graciously worked hard to publish this manual in time

**Practical Handbook of Pharmacognosy for M.Pharm** Dr Amit Kumar Verma, Ms Surabhi Shakya,2023-12-27 The practical handbook is intended to introduce the practical of Pharmacognosy for the students of M Pharm The purpose of this practical book is to clearly explain the principle and procedure of the associated practical which are designed according to the syllabus of Pharmacy Council of India The practical included in the book is associated with the subjects of Herbal Cosmetics Medicinal Plant Biotechnology Modern Pharmaceutical Analytical Techniques and Phytochemistry associated with the code MPG 104T and MPG 105T Description of each and every practical and its procedure mention in step by step manner which is easy to understand and perfectly perform The book mention the preparation of various cosmetic formulations like face pack face scrub hair dye vanishing cream dusting powder herbal hair oil and many more including their evaluation methods the analysis of sample by Infrared spectroscopy and UV Vis spectroscopy like after the extraction of oil and its analytical evaluation by IR spectroscopy gives the idea about the phytoconstituents present in sample the extraction of DNA from the plant sample and tissue culture technique The objective of each practical is precisely related to the objectives as mention in the syllabus The support and encouragement from many people made the possible ways for the completion of this book The suggestions consideration or comment will be valuable and greatly acknowledge as they will surely help in future

Pharmaceutical chemistry practical work may involve Recrystallization A purification technique that involves dissolving a compound and impurities in a solvent then allowing the compound to crystallize out as the solution cools Limit tests For example a limit test to determine the chloride content of a water sample Decolorizing potassium permanganate Heating potassium permanganate with ethanol to reduce it and remove the precipitate formed

Pharmaceutical chemistry is concerned with the design synthesis and development of drugs Topics covered in pharmaceutical chemistry include Drug discovery and development Organic functional groups in drug molecules Drug target interactions Physicochemical properties of drugs and Ethical issues in pharmaceutical development

Pharmaceutics is the study of how to develop a new chemical into a safe and effective medication Pharmaceutics practical courses involve learning about the preparation quality control logistics dispensing and use of medicines Here are some resources for learning about pharmaceutics practical

Practical Pharmaceutics This book covers the preparation control logistics dispensing and use of medicines It includes practical examples information on current guidelines and EU legislation Pharmacognosy is the study of natural products including their chemical physical and biological properties and their potential for medicinal use Practical pharmacognosy involves a number of activities including Extraction isolation and characterization Isolating and characterizing natural compounds from plants and other organisms Plant tissue culture Growing plant tissue in a lab setting

Biochemical transformations Studying biochemical transformations in natural products Biosynthetic pathways Studying biosynthetic pathways in natural products Phyto pharmaceuticals and Phytotherapy Studying phyto pharmaceuticals and Phytotherapy Analysis of biological chemical biochemical and physical properties Analyzing the biological chemical biochemical and physical properties of natural products Magnification Using magnification to make small objects appear larger such as microscopic organisms Social pharmacy practical courses teach students about the role of pharmacists in public health and social pharmacy activities These courses cover a range of topics including National health programs The role of pharmacists in national immunization programs and reproductive and child health programs Health education Health education and promotion First aid First aid for emergency conditions including cardiopulmonary resuscitation and basic life support Public health awareness Public health awareness and health hazards Preventive measures Preventive measures for communicable diseases and tobacco cessation Oral health Oral health and hygiene Hand washing Hand washing technique Cough and sneeze etiquette Cough and sneeze etiquette PPE kit Standard operating procedure for wearing a PPE kit Masks How to wear and dispose of masks Disinfectants Different types of disinfectants and marketed preparations Antiseptics Antiseptics and marketed products Fumigating agents Fumigating agents and marketed products Antiviral agents Antiviral agents and marketed products Social pharmacy is a multidisciplinary field of education and research that focuses on the use regulation provision and role of medicines in society It covers the social psycho social economic and organizational aspects of medicines Pharmacology is the study of how drugs interact with living organisms and practical pharmacology involves hands on activities to learn about drug effects and administration Laboratory techniques Students learn how to perform experiments and analyze data They may also learn how to use laboratory animals such as mice and rats to study drug effects Drug administration Students learn how to administer drugs intravenously intramuscularly intraosseously and subcutaneously They also learn how to use drug delivery devices such as inhalers nebulizers and insulin pens Drug development Students learn about the basics of clinical trials and drug development Adverse drug reactions Students learn how to report adverse drug reactions and fill out an ADR reporting form Therapeutic drug monitoring Students learn about therapeutic drug monitoring and how to use it in clinical settings A biochemistry practical typically involves performing laboratory experiments to analyze and quantify various biological molecules like carbohydrates proteins lipids and nucleic acids within living organisms using techniques like spectrophotometry electrophoresis and enzyme assays to understand their structure function and metabolic pathways often with a focus on clinical applications to diagnose diseases by examining bodily fluids like blood and urine Key aspects of a biochemistry practical Qualitative analysis Identifying the presence of specific biomolecules through simple chemical tests like testing for reducing sugars with Benedict s reagent or proteins with the Biuret reaction Quantitative analysis Accurately measuring the concentration of a specific biomolecule using standardized methods like estimating blood glucose levels with the glucose oxidase method or protein concentration with the

Bradford assay Enzyme kinetics Studying the rate of enzyme catalyzed reactions by varying substrate concentrations and measuring the reaction product formation over time Electrophoresis Separating and analyzing biological molecules based on their size and charge using agarose or polyacrylamide gels including protein electrophoresis to identify different protein bands Chromatography Separating and isolating biomolecules based on their affinity for a stationary phase such as thin layer chromatography for lipid analysis Pharmacotherapeutics is the use of drugs to prevent treat diagnose or modify normal functions of the body Pharmacotherapeutics practical courses teach students how to apply pharmacological knowledge and disease knowledge to prevent mitigate or cure diseases Here are some topics covered in pharmacotherapeutics practical courses Accessing patients drug therapy needs Selecting suitable therapies Managing diseases and ailments The role of a pharmacy practitioner Checking doctor prescriptions Evaluating drugs for their generic name dose route and more Counseling patients and their relatives Monitoring drug therapy Community pharmacy practical s may include Prescription filling Handling and filling prescriptions professionally Patient counseling Providing advice to patients on diseases minor ailments and prescription and non prescription medicines Counseling materials Preparing materials such as patient information leaflets Basic health screening Performing basic health screening tests such as blood pressure blood sugar and cholesterol monitoring Role play Interacting with patients and giving them counseling tips on the proper use storage and administration of dosage forms Community pharmacies are healthcare facilities that provide pharmaceutical and cognitive services to the public They are also known as retail pharmacies or chemists Community pharmacists are considered to be the most accessible health professional to the public as they are available to provide personalized advice about health and medicine on a walk in basis
