Excerpt from Practical Marine Surveying The need of a suitable text book on Marine Surveying for use at the Naval Academy has been felt for several years by the officers engaged in teaching that subject Having been engaged exclusively in surveying work for six years previous to my assignment to duty at the Naval Academy I was requested by the Head of Department of Astronomy Navigation and Surveying to prepare a text book on Marine Surveying to take the place of the one then in use After considerable thought I agreed to undertake the task and the present volume is the result and it is earnestly hoped that it may be of value not only as a text book for the Academy but to others who may be without experience in surveying work About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
