Chapter 5

THE FINANCIAL SYSTEM, CORPORATE GOVERNANCE, AND INTEREST

FOCUS

This chapter begins with an overview of the flow of funds around the economy concentrating on the role of financial markets in channeling consumers' savings to companies for investment in productive resources. The operation of the stock market is studied in some detail.

The second part of the chapter deals with ethics in corporate governance and its effect on the financial and accounting world. We discuss business ethics in the context of executive compensation and the moral hazard created by stock based compensation systems and the temptations they can create for executives who can influence financial reporting. From there we embark on reviews of the two major financial crises of the first decade of the twenty-first century. We cover the excesses of the 1990s, the market decline of 2000, and the government's attempt to legislate against a recurrence in the Sarbanes-Oxley Act of 2002. We then briefly summarize the major provisions of SOX.

The next section is a detailed review of the financial crisis of 2008. The treatment begins with home mortgages and the concept of borrower qualification as well as certain problems faced by lenders if they retain mortgages on their own balance sheets. We then cover securitization and the emergence of Collateralized Debt Obligations (CDOs) as well as the reasons for their popularity before the crisis. That leads into the subprime mortgage market and the eventual risk condition of the CDOs that permeated the financial community on the eve of the crisis. We then review the interest rate increases in 2004-6 that triggered subprime mortgage defaults and the fall of CDOs that froze credit markets. We then discuss why the crisis was a governance issue regarding ethics rather than illegality, and end with a brief treatment of the Dodd-Frank Act.

The third part of the chapter involves a detailed study of interest and its effect on financial markets. The nature of interest is explored breaking the observed rate into its components of a pure rate, an inflation adjustment, and compensation for bearing various risks. We end with a discussion of yield curves and interest rate spreads as predictors of economic activity.

TEACHING OBJECTIVES

Students should gain an understanding of the basic financial flows around an industrialized economy and how those flows are made possible by organized financial markets. They should also acquire a working knowledge of how the stock market functions and understand how to read stock quotations. In addition students should develop an understanding of the concepts underlying interest including the pure rate, inflation, and various risk elements.

They should also come to appreciate the idea of corporate governance and the ethical issues faced by executives.

In the section on the financial crisis they should develop an understanding of the reasons behind the crisis of 2008 and a familiarity with the major events and bailouts that took place as it developed.

Resisting

Corporate Corruption Stephen V. Arbogast,2008 As scandals at Enron WorldCom and elsewhere became public American business schools came under attack for inadequate ethical formation of the country's up and coming managers A less obvious but related problem has been the lack of realistic ethical training material Now this author a 32 year senior financial executive has adapted the Enron story to address this pressing need Drawing upon his own experience within a highly disciplined corporate culture the author has extracted from the wreckage case studies that chart Enron's descent into fraud and ask students to consider how it could have been different These 17 practical case studies don't just retell the Enron story they select pivotal moments when key individuals faced decisions that could carry the firm across another threshold of ethical decomposition Students will get the opportunity to stand in the shoes of the young Ken Lay as he pondered how to handle Enron's first trading scandal They will have the opportunity to consider how to oppose Jeff Skilling's plans to introduce Mark to Market accounting and Andy Fastow's ever more aggressive use of Special Purpose Entities Finally they will have a chance to reconsider the tactics adopted by those who did resist Was for example Sherron Watkins right to take her concerns to Ken Lay or should she have made her case elsewhere
