Industrial Revolution

4. What caused the dark color in the moths?

The dark color was caused by a mutation in the DNA of a single moth and the mutated gene had been passed to all its offspring.

5. Genetics explained the dark color of the moths. What explained why the dark colored moths were taking over?

Natural Selection

6. Complete the summary of Natural Selection.

Natural Selection was proposed by Charles Darwin to explain how new species evolve. All types of living things have small differences between the individuals in the species. If one of those differences allows the individual to live longer, they will have more offspring. As that trait is passed on, the species starts to look more like the successful individual. Overtime, the species changes.

7. In the last 50 years, most industrial countries have reduced the amount of pollution. Based on the theory of natural selection, describe the moth population today.

The dark moths are dropping because the forests are becoming cleaner.
