only one of its kind in the market because this book gives complete analysis of the chapterwise questions based on the previous years examination Moreover all solutions are fully explained with a reference to the concerned book given after each solution It definitely helps in the elimination of redundant topics which are not important from examination point of view So the students will be able to reduce the volume of text matter to be studied Besides solutions are presented in lucid and understandable language for an average student Dr T Venugopal Associate Professor Department of CSE JNTUH Jagtial Overall I think this book represents an extremely valuable and unique contribution to the competitive field because it captures a wealth of GATE PGECET examination s preparation experience in a compact and reusable form This book is certainly one that I shall turn into a regular practice for all entrance examinations preparation guides This book will change the way of preparation for all competitive examinations Professor L V N Prasad CEO Vardhaman College of Engineering Hyderabad I began to wish that someone would compile all the important abstracting information into one reference as the need for a single reference book for aspirants had become even more apparent I have been thinking about this project for several years as I have conducted many workshops and training programs This book is full of terms phrases examples and other key information as well as guidelines that will be helpful not only for the students or the young engineers but also for the instructors Professor R Muraliprasad Professional Trainer GATE IES PSU Hyderabad The book which will prove to be an epitome of learning the concepts of CS and IT for GATE PGECET examination is purely intended for the aspirants of GATE and PGECET examinations It should also be of considerable utility and worth to the aspirants of UGC NET as well as to those who wish to pursue career in public sector units like ONGC NTPC ISRO BHEL BARC DRDO DVC Power grid IOCL and many more In addition the book is also of immense use for the placement coordinators of GATE PGECET *Advances on Databases and Information Systems* Tadeusz Morzy,Theo Haerder,Robert Wrembel,2012-09-13 This book constitutes the thoroughly refereed proceedings of the 16th East European Conference on Advances in Databases and Information Systems ADBIS 2012 held in Poznan Poland in September 2012 The 32 revised full papers presented were carefully selected and reviewed from 122 submissions The papers cover a wide spectrum of issues concerning the area of database and information systems including database theory database architectures query languages query processing and optimization design methods data integration view selection nearest neighbor searching analytical query processing indexing and caching concurrency control distributed systems data mining data streams ontology engineering social networks multi agent systems business process modeling knowledge management and application oriented topics like RFID XML and data on the Web *Making data portability more effective for the digital economy* Jan Krämer,Pierre Senellart ,Alexandre de Streel,2020-06-15 This study provides recommendations on how to make personal data portability more effective This will truly empower consumers to use the services they want and share their data with whoever they wish and stimulate innovation in Europe With the entry into force of the GDPR European citizens gained new rights notably with data portability

But two years later there is still little sign of people exercising this right and of companies offering an easy and convenient service for data portability While the European Commission is finalising its evaluation of the GDPR and closes its consultation on the European data strategy the authors professors Jan Kr mer Pierre Senellart and Alexandre de Streel warn that the current legal framework requires clarifications to better empower European citizens in a data driven society In this study they identify barriers to data portability including the lack of possibilities to import data as well as the lack of common standards and tools to access data as easy as the click of a button The ability to provide users with a centralised dashboard for monitoring and controlling the flow of their data is also critically missing Today consumers do not widely use data portability for reasons that can and should be overcome Making data portability more effective is better for competition for innovation and to empower users stress the authors There should be no second guessing on whether to make data portability more effective the time to act is now The current EU framework encourages data portability but there are legal gaps that the EU should fill The authors insist on the need for detailed guidance on how data portability can be facilitated and on which data is subject to data portability without violating privacy rights They advocate that data provided by users when using a service such as search history i e observed data should clearly be included under the scope of data portability The authors consider it essential that the obligation to offer standardised Application Programming Interfaces APIs be much more widespread to enable consumers to continuously port their data We believe that standardised APIs that enable continuous data portability is a prerequisite for encouraging more organisations to import personal data and for encouraging more consumers to initiate such transfers explain the authors Projects such as the Data Transfer Project have highlighted that continuous data portability is technically feasible The authors argue that Personal Management Information Systems PIMSs facilitate the complex consent management and offer users a centralised dashboard for monitoring and controlling the flow of their data will have a crucial role to play for the wider adoption of data portability It must be as easy as clicking a button for consumers to continuously share data they created with one provider to another provider This may also require educating and informing users on their rights through information campaigns alongside clear policy measures explain the authors Nevertheless they stress that PIMSs are not likely to find a sustainable business model and thus policy makers should support the emergence of open source projects by setting common standards for data transfers consent management and identity management **Benchmarking Transaction and Analytical Processing Systems** Anja Bog,2013-07-11 Systems for Online Transaction Processing OLTP and Online Analytical Processing OLAP are currently separate The potential of the latest technologies and changes in operational and analytical applications over the last decade have given rise to the unification of these systems which can be of benefit for both workloads Research and industry have reacted and prototypes of hybrid database systems are now appearing Benchmarks are the standard method for evaluating comparing and supporting the development of new database systems Because of the separation of OLTP and OLAP systems existing benchmarks are

only focused on one or the other With the rise of hybrid database systems benchmarks to assess these systems will be needed as well Based on the examination of existing benchmarks a new benchmark for hybrid database systems is introduced in this book It is furthermore used to determine the effect of adding OLAP to an OLTP workload and is applied to analyze the impact of typically used optimizations in the historically separate OLTP and OLAP domains in mixed workload scenarios
