Griffith, 2004-10-04 Fat People Don't Go to Heaven screamed a headline in the tabloid Globe in November 2000 The story recounted the success of the Weigh Down Workshop the nation's largest Christian diet corporation and the subject of extensive press coverage from Larry King Live to the New Yorker In the United States today hundreds of thousands of people are making diet a religious duty by enrolling in Christian diet programs and reading Christian diet literature like What Would Jesus Eat and Fit for God Written with style and wit far ranging in its implications and rich with the stories of real people Born Again Bodies launches a provocative yet sensitive investigation into Christian fitness and diet culture Looking closely at both the religious roots of this movement and its present day incarnations R Marie Griffith vividly analyzes Christianity's intricate role in America's obsession with the body diet and fitness As she traces the underpinning of modern day beauty and slimness ideals as well as the bigotry against people who are overweight Griffith links seemingly disparate groups in American history including seventeenth century New England Puritans Progressive Era New Thought adherents and late twentieth century evangelical diet preachers *Approaches to the Development of Moral Reasoning* Peter E.

Langford, 2018-10-24 The first part of the book offers a survey of current approaches to the development of moral reasoning those of Freud ego psychology Piaget and Kohlberg The approach of Kohlberg has been popular because he was able to give an impressive account of findings from the key method of interviews the other crucial method being naturalistic observation of moral discourse The accounts of interview evidence given by ego psychology and Piaget were less comprehensive and less impressive Naturalistic studies have either been impressionistic or less detailed in their methods of analysis The second part of the book argues that the impressive nature of Kohlberg's later evidence for his view that moral reasoning passes through a sequence of stages is in part illusory because his theory predicts that specific types of reply will show specific developmental

patterns However as data are always reported in terms of stages which amalgamate very disparate types of reply it is impossible to know whether the specific types of reply follow their predicted developmental courses or not Reasons given for assigning given types of reply to a stage are also often doubtful This leads to discussion of studies that have reported findings in terms of specific types of reply weakly interpretive methods as opposed to Kohlberg s stage based and strongly interpretive methods Findings from these disconfirm Kohlberg s theory at several crucial points The second and third parts of the book also examine findings from non Kohlbergian interviews and other methods again advocating that weakly interpretive and largely descriptive presentation of findings is preferable to strongly interpretive techniques It is argued that a wide variety of mechanisms suggested by the theories outlined in the first part of the book as well as others drawn from general theories of personality development are able to explain existing descriptive developmental findings The task for the future is to assess the relative importance of these mechanisms
