**Of Spies and Lies** John F. Sullivan, 2002 John Sullivan was one of the CIA's top polygraph examiners during the final four years of the war in Vietnam where he served longer and conducted more lie detector tests than any other examiner and worked with more agents than most of his colleagues His job was to evaluate the reliability of the agency's information sources an assignment that gave him a more intimate view of the war than was afforded most other participants      **Ease Seminar** Frances Luttikhuisen, 2000      *New York for Sale* Tom Angotti, 2011-02-25 How community based planning has challenged the powerful real estate industry in New York City Remarkably grassroots based community planning flourishes in New York City the self proclaimed real estate capital of the world with at least seventy community plans for different neighborhoods throughout the city Most of these were developed during fierce struggles against gentrification displacement and environmental hazards and most got little or no support from government In fact community based plans in New York far outnumber the land use plans produced by government agencies In New York for Sale Tom Angotti tells some of the stories of community planning in New York City how activists moved beyond simple protests and began to formulate community plans to protect neighborhoods against urban renewal real estate mega projects gentrification and environmental hazards Angotti both observer of and longtime participant in New York community planning focuses on the close relationships among community planning political strategy and control over land After describing the political economy of New York City real estate its close ties to global financial capital and the roots of community planning in social movements and community

organizing Angotti turns to specifics He tells of two pioneering plans forged in reaction to urban renewal plans including the first community plan in the city the 1961 Cooper Square Alternate Plan a response to a Robert Moses urban renewal scheme struggles for environmental justice including battles over incinerators sludge and garbage plans officially adopted by the city and plans dominated by powerful real estate interests Finally Angotti proposes strategies for progressive inclusive community planning not only for New York City but for anywhere that neighborhoods want to protect themselves and their land New York for Sale teaches the empowering lesson that community plans can challenge market driven development even in global cities with powerful real estate industries *The Science of Environmental Pollution* Frank R.
