LeVasseur, Kate Kinsella, Kevin Feldman, Prentice Hall Direct Education Staff, 2004-05 *Beyond Civilization* Harry Redner, 2013-01-31 For Harry Redner the phrase beyond civilization refers to the new and unprecedented condition the world is now entering specifically the condition commonly known as globalization Redner approaches globalization from the perspective of history and seeks to interpret it in relation to previous key stages of human development His account begins with the Axial Age 700 300 BC and proceeds through Modernity after AD 1500 to the present global condition What is globalization doing to civilization In answering this question Redner studies the role played by capitalism the state science and technology He aims to show that they have had a catalytic impact on civilization through their reductive effect on society culture and individualism However Redner is not content to diagnose the ills of civilization he also suggests how they might be ameliorated by cultural conservation Above all it is to the problem of decline in the higher forms of literacy that he addresses himself for it is on the culture of the book that previous civilizations were founded This study will be of interest to sociologists historians and social and political theorists Its style makes it accessible also to general readers interested in civilization past present and future **World History: Connections to Today** Elisabeth Gaynor Ellis, Pearson/Prentice Hall, 2003-12 **Human Nature and Historical Knowledge** Leon Pompa, 1990 This is a challenging book about the presuppositions of historical knowledge **To Get a Better School System** Gene B. Preuss, 2009 Gene B Preuss examines not only the public policy wrangling and historical context leading up to and surrounding the Gilmer Akin legislation but also places the discussion in the milieu of the national movement for school reform Battalion Commanders at War Steven Thomas Barry, 2013-05-23 Most histories of the U S Army in World War II view the Mediterranean Theater of Operations primarily as a deadly training ground for very green forces where lessons learned on the beaches of Oran in the hills of the Kasserine Pass area and at the collapse of the Tunis bridgehead all contributed to later success in Western Europe Steven Barry however contends that victory in the MTO would not have materialized without the leadership of battalion level commanders They operated at a high level despite the lack of combat experience for themselves and their troops ineffective leadership at higher levels and deficiencies in equipment organization and mobilization Barry portrays these officers as highly trained adaptable and courageous in their first combat experiences in North Africa and Sicily Their leadership he argues brought discipline maturity experience and the ability to translate common operational guidance into tactical reality

and thus contributed significantly to battlefield success in North Africa and Sicily in 1942 1943 To explain how this happened he examines their prewar experiences including professional military education and unit training exercises personal factors such as calmness and physical resilience under fire and the ability to draw upon doctrine creatively apply the resources at their disposal and clearly define and communicate mission goals and means He also reveals how battalion leaders incorporated technological innovations into combined arms maneuvers by employing tank capabilities and close air support doctrine As Barry s assessment shows these battalion commanders were not the sole reason for the Allied triumph in North Africa and Sicily but victory would not have been possible without the special brand of military leadership they exhibited throughout those campaigns Under their leadership even inexperienced units were able to deliver credible combat performance and without the regular army battalion leaders U S units could not have functioned tactically early in the war One of the few studies to focus on tactical adaptation at the battalion level in conventional warfare Barry s book attests to the pivotal value of professional military education and makes an important contribution to today s organizational learning debate while providing an in depth view of adaptation of U S infantry and armored forces in 1942 1943 *The Athenaeum*, 1849

John Dewey and Environmental Philosophy Hugh P. McDonald, 2012-02-01 Hugh P McDonald s John Dewey and Environmental Philosophy breaks new ground by applying Dewey s insights to a new approach to philosophy of the environment the concern for the rights of animals the preservation of rare species habitats and landscapes and the health of the whole ecology The book summarizes much of the current literature on environmental ethics concentrating on the writings of major figures in the movement Tom Regan J Baird Callicott Holmes Rolston and Bryan Norton The heart of the book consists of a detailed analysis of Dewey s ethics his theory of intrinsic value and his holistic approach to moral justification Arguing against the idea that Dewey s philosophy is anthropocentric McDonald makes a strong case that using Dewey s philosophy will result in a superior framework for environmental ethics *Morals and the Media* Nick Russell, 1994

Confronted daily with decisions on how to present their stories what to write and what not to write journalists and the media are frequently accused of sensationalizing of choosing to report the bad news and of misquoting those they interview In this substantially updated edition of *Morals and the Media* Nick Russell addresses many of the concerns the public has about the media as he examines why the media behave the way they do He also discusses how values have been developed and applied and suggests value systems that can be used to judge special situations
