Accounting and Regulation Roberto Di Pietra, Stuart McLeay, Joshua Ronen, 2013-11-05 Since 1998 the world's leading experts on accounting and regulation have convened in a series of workshops to explore and analyze emerging issues in the field. They have covered a wide array of topics including corporate governance, auditing, financial disclosure, international standards, boards, and the dynamics of markets and institutions. Most recently, they have focused on the role that accounting practices and policies may have played in the global financial crisis of 2008. In this volume, the editors showcase contributions from the workshops that represent the full spectrum of issues and perspectives relating to accounting and regulation. Each paper incorporates the most current examples and references to reflect the latest insights with an emphasis on exploring future implications for theory and research practice and policymaking.

Sandhu, Kamaljeet, 2020-06-26 In a world dependent on digital technologies, business corporations continually try to stay ahead of their competitors by adopting the most updated technology into their business processes. Many companies are adopting digital transformation models: data analytics, big data, data empowerment, and data sharing as key strategies, and as service disruptors for information delivery and record management. Higher education institutions have adopted digital service innovation as a core to driving their business processes. Such services are key to ensuring efficiency and improving organizational performance. Digital Transformation and Innovative Services for Business and Learning is a collection of innovative research on the latest digital services and their role in supporting the digital transformation of businesses and education. While highlighting topics including brand equality, digital banking, and generational workforce, this book is ideally designed for managers, executives, IT consultants, industry professionals, academicians, researchers, and students.
