Who Owns Appalachia? Appalachian Land Ownership Task

Force, 2014-07-15 Long viewed as a problem in other countries the ownership of land and resources is becoming an issue of mounting concern in the United States Nowhere has it surfaced more dramatically than in the southern Appalachians where the exploitation of timber and mineral resources has been recently aggravated by the ravages of strip mining and flash floods This landmark study of the mountain region documents for the first time the full scale and extent of the ownership and control of the region's land and resources and shows in a compelling yet non polemical fashion the relationship between this control and conditions affecting the lives of the region's people Begun in 1978 and extending through 1980 this survey of land ownership is notable for the magnitude of its coverage It embraces six states of the southern Appalachian region Virginia West Virginia Kentucky Tennessee North Carolina and Alabama From these states the research team selected 80 counties and within those counties field workers documented the ownership of over 55 000 parcels of property totaling over 20 million acres of land and mineral rights The survey is equally significant for its systematic investigation of the relations between ownership and conditions within Appalachian communities Researchers compiled data on 100 socioeconomic indicators and correlated these with the ownership of land and mineral rights The findings of the survey form a generally dark picture of the region local governments struggling to provide needed services on tax revenues that are at once inadequate and inequitable economic development and diversification stifled increasing loss of farmland a traditional source of subsistence in the region Most evident perhaps is the adverse effect upon housing resulting from corporate ownership and

land speculation Nor is the trend toward greater conglomerate ownership of energy resources the expansion of absentee ownership into new areas and the search for new mineral and energy sources encouraging Who Owns Appalachia will be an enduring resource for all those interested in this region and its problems It is moreover both a model and a document for social and economic concerns likely to be of critical importance for the entire nation Uninvited Neighbors Herbert G. Ruffin,2014-03-28 In the late 1960s African American protests and Black Power demonstrations in California s Santa Clara County including what s now called Silicon Valley took many observers by surprise After all as far back as the 1890s the California constitution had legally abolished most forms of racial discrimination and subsequent legal reform had surely taken care of the rest White Americans might even have wondered where the black activists in the late sixties were coming from because beginning with the writings of Fredrick Jackson Turner the most influential histories of the American West simply left out African Americans or later portrayed them as a passive and insignificant presence Uninvited Neighbors puts black people back into the picture and dispels cherished myths about California s racial history Reaching from the Spanish era to the valley s emergence as a center of the high tech industry this is the first comprehensive history of the African American experience in the Santa Clara Valley Author Herbert G Ruffin II s study presents the black experience in a new way with a focus on how despite their smaller numbers and obscure presence African Americans in the South Bay forged communities that had a regional and national impact disproportionate to their population As the region industrialized and spawned suburbs during and after World War II its black citizens built institutions such as churches social clubs and civil rights organizations and challenged socioeconomic restrictions Ruffin explores the quest of the area s black people for the postwar American Dream The book also addresses the scattering of the black community during the region s late yet rapid urban growth after 1950 which led to the creation of several distinct black suburban communities clustered in metropolitan San Jose Ruffin treats people of color as agents of their own development and survival in a region that was always multiracial and where slavery and Jim Crow did not predominate but where the white embrace of racial justice and equality was often insincere The result offers a new view of the intersection of African American history and the history of the American West
