Errans Christoph F. E. Holzhey, Arnd Wedemeyer, 2022-09-20 Today's critical discourses and theorizing vanguards agree on the importance of getting lost of failure of erring as do life coaches and business gurus The taste for a departure from progress and other teleologies the fascination with disorder unfocused modes of attention or improvisational performances cut across wide swaths of scholarly and activist discourses practices in the arts but also in business warfare and politics Yet often the laudible failures are only those that are redeemed by subsequent successes What could it mean to think errancy beyond such restrictions And what would a radical critique of productivity success and fixed determination look like that doesn't collapse into the infamous I would prefer not to This volume looks for an answer in the complicated word field branching and stretching from the Latin *errare* Its contributions explore the implications of embracing error randomness failure non teleological temporalities across different disciplines discourses and practices with critical attention to the ambivalences such an impossible embrace generates

theory and trauma studies *Can Pop Culture and Shakespeare Exist in the Same Classroom?* Kristine Gritter, Kathryn Schoon-Tanis, Matthew Althoff, 2014-04-11 Expecting students to jump right into a rigorous literature discussion is not always realistic. Students need scaffolding so that they will be more engaged and motivated to read the text and think about it on a deeper level. This book shows English language arts teachers a very effective way to scaffold by tapping into students' interest in pop culture. You'll learn how to use your students' ability to analyze pop culture and transfer that into helping them analyze and connect to a text. Special Features: Tools you can use immediately such as discussion prompts, rubrics, and planning sheets. Examples of real student literature discussions using pop culture. Reflection questions to help you apply the book's ideas to your own classroom. Connections to the Common Core State Standards for reading, speaking, and listening. Throughout the book, you'll discover practical ways that pop culture and classic texts can indeed coexist in your classroom. As your students bridge their academic and social lives, they'll become more insightful about great literature and the world around them.

Shakespeare in Children's Literature Erica Hateley, 2009-01-13 Shakespeare in Children's Literature looks at the genre of Shakespeare for children, considering both adaptations of his plays and children's novels in which he appears as a character. Drawing on feminist theory and sociology, Hateley demonstrates how Shakespeare for children utilizes the ongoing cultural capital of Shakespeare and the pedagogical aspects of children's literature to perpetuate anachronistic forms of identity and authority.

The Transcendent Vision of Mythopoeic Fantasy David S. Hogsette, 2022-07-22 An ever-expanding critical library on fantasy fiction requires an analysis of why the genre is so ubiquitous, enduring, and beloved. This work analyzes the mythic elements in foundational fantasy texts, arguing that mythopoeic fantasy reveals timeless truths that link human cultures past and present. Through close readings of works like *Phantastes*, *The King of Elfland's Daughter*, *The Fellowship of the Ring*, *The Lion the Witch and the Wardrobe*, *A Wizard of Earthsea*, *The Neverending Story*, *A Wrinkle in Time*, and *Out of the Silent Planet*, this book explores how mythopoeic fantasy speaks to the deepest concerns of the human heart. It investigates the genre's use of an imagination that is sometimes atrophied by the demands of contemporary life and explores how fantasy provides restoration, consolation, and hope within a cultural context that too often decries such ideas. Each chapter focuses on a representative text, providing author background and engaging relevant scholarship on a variety of relevant thematic issues. Offering new insights on these classic texts by drawing upon post-secular critical approaches, this work is suitable for both new and seasoned students of fantasy.

Reading Madeleine L'Engle Heidi A. Lawrence, 2023-10-20

Using a critical lens derived from ecopsychology and its praxis ecotherapy this book explores the relationships Madeleine L. Engle develops for her characters in a selection of the novels from her three Time Austin family and O Keefe family series as those relationships develop along a human nonhuman kinship continuum. This is accomplished through an examination both of pairs of novels from the fantastic and the realistic series and of single novels which stand out as slightly different from the most prominent genre in a given series. Thus this examination also shows L. Engle's fluid movement along a fantasy reality continuum and demonstrates the integration of the three series with each other. Importantly through examining these relationships and this movement along continuums in these novels the project demonstrates how ecopsychology and ecotherapy provide strong and important and as yet virtually unexplored intersections with children's literature.

Teaching Writing Tessa Daffern, Noella M. Mackenzie, 2020-07-25. In the 21st century writing is more important than at any other time in human history. Yet much of the emphasis in schooling has been on reading and after the early years writing skills have been given less attention. Internationally too many children are leaving school without the writing skills they need to succeed in life. The evidence indicates that students rarely develop proficiency as writers without effective teacher instruction. *Teaching Writing* offers a comprehensive approach for the middle years of schooling when the groundwork should be laid for the demanding writing tasks of senior school and the workplace. *Teaching Writing* outlines evidence-based principles of writing instruction for upper primary students and young adolescents. It presents strategies that are ready for adoption or adaptation and exemplars to assist with designing and implementing writing lessons across the middle years of school. It addresses writing from a multimodal perspective while also highlighting the importance of teaching linguistic aspects of text design such as sentence structure vocabulary and spelling as foundations for meaning making. Contributors argue that students need to continue to develop their skills in both handwriting and keyboarding. Examples of the teaching of writing across disciplines are presented through a range of vignettes. Strategies for assessing student writing and for supporting students with diverse needs are also explored. With contributions from leading literacy educators *Teaching Writing* is an invaluable resource for primary secondary and pre-service teachers.
