The Perfect Norm Sandra Vavra, Sharon L. Spencer, 2009-02-01 Our goal in writing this book was to validate teachers for strong efforts in their life s work We often observe teachers frustrations with what they perceive to be a multitude of different hot topics in education that they must attend to now but which they expect to come and go like the last hot topics So we wanted to help readers see similarities between many of these hot topics differentiation multiple intelligences culturally responsive teaching brain friendly strategies authentic assessment and ethical classroom management which we feel are not flashes in the pan And we trust that serious practitioners will not oversimplify the findings of neuroscientists and their application to education Reading studies and books by scientists a number of which are user friendly can help ensure that teachers separate the hype from credible information We have seen this professionally judicious approach in the work of graduate students Kolinski 2007 in adopting brain friendly strategies We have intentionally packed both theoretical research based and practical information in this book because professional educators want to know why they should use certain approaches models and strategies In turn as professionals we should be able to explain why we teach the way we do not to justify but to educate others about our knowledge based reflective decision making processes and the impact on student learning Thus it is important to read Chapter 1 because it lays a foundation Each succeeding chapter 2 6 has unique and compelling twists and turns chock full of ideas to use or to adapt It is possible to gain lots of ideas processes and strategies from reading and implementing or adapting even one of the unit chapters or a part of it While some of the units are explicitly about literacy others focus on content using reading writing speaking and listening as critical in the learning process Thus literacy skills are reinforced and strengthened Additionally some of our colleagues and public school partners have given us feedback that they wanted to

implement some of the units and activities themselves So feel free to use this book for self exploration and professional development
