Writing Scientific Papers In English Successfully Your Complete Roadmap:

Writing Scientific Papers in English Successfully Ethel Schuster Editor, Haim Levkowitz Editor, Osvaldo N Oliveira Jr Editor, 2014-11-23 Having to communicate in English is necessary in today's world. English is the lingua franca of science and of the speedy communications we depend on, namely the Internet, the World Wide Web, social media, crowdsourcing, and other information sharing resources. The challenge to produce well-written papers is especially hard for non-native speakers of English; the majority of scientists around the world. Effective scientific writing requires both mastery of the English language and proficiency in the specific academic genre. We have developed a strategy to tackle the problems faced by writers who are new to the scientific writing genre and style. This strategy can help both non-natives attempting to overcome the language barrier and native speakers of English. This book is divided into two parts: the first part provides the theoretical foundations of scientific writing. The second part details the strategies, techniques, and tools that are at the heart of our approach. Preface
