If you know how to use Linux and a few basic development tools, Perl, the BASH shell, development libraries, and the GNU C compiler, *Linux Smart Homes For Dummies* will help you do all these tricks and more. For example, you can discover the best sources for Linux based home automation devices, set up a wireless network, create a wireless access point, build a bridge between wired and wireless networks, and route your own network traffic. Build a personal video recorder with MythTV that will record to DVD, or set up a wireless streaming music system. Create a smart phone system that takes messages and forwards them to your fax modem or answering machine. Build a weather station that notifies you of severe weather alerts. Control and secure your home automation network, and even check on your house when you're away. The bonus CD-ROM includes all kinds of cool open source software for your home automation projects. *Linux Smart Homes For Dummies* even includes lists of cool gadgets to check out and great ways to automate those boring household chores. A smart home's a happy home.
