### Piaget's Theory of Cognitive Development:

- What is an example of a schema?
  - A child has only interacted with small dogs, so they believe all dogs are small.
- What are each of these? Give an example of each occurring.
  - Adaptation
    - Adding information to a schema- dogs can be both big and small
  - Assimilation
    - A child identifies a dog because it resembles their dog schema.
  - Accommodation
    - Changing the schema – a child sees a big dog and understands that not all dogs are small.
  - Equilibrium
    - Applying previous information and new information to update schema.
