**Evolution and "the Sex Problem"** Bert Bender,2004 A noteworthy investigation of the Darwinian element in American fiction from the realist through the Freudian eras theories of sexual selection and of the emotions are essential elements in American fiction from the late 1800s through the 1950s particularly during the Freudian era and the years surrounding the Scopes trial the Sex Problem and what resulted was a great diversity of American narratives aligned with either Darwinian or a number of anti Darwinian theories of evolution Included are intriguing discussions of works by Frank Norris Jack London Stephen Crane Theodore Dreiser Gertrude Stein Willa Cather Sherwood Anderson F Scott Fitzgerald five writers of the Harlem Renaissance John Steinbeck and Ernest Hemingway Among the ideas explored are Darwin s theory of common descent the question of man s place in nature the possibility of evolutionary progress the issues of heredity and eugenics the Darwinian basis of Freud s theory of sexual repression the quandary of male violence and the role of female choice in sexual selection the power of and the problems of racial and sexual selection the power of and the problems of racial and sexual difference and the ecological problems that arose directly from Darwin s theory of evolution America s major narratives of human life and love and will be appreciated by literary scholars and readers interested in Darwinism and culture

**Wisdom, Consciousness, and the Future** Thomas Lombardo,2011-06-17 Wisdom Consciousness and the Future Collected Essays Thomas Lombardo Ph D Center for Future Consciousness Wisdom Consciousness and the Future is a profound deeply important and timely book that concerned people and change agents everywhere will want to read Copthorne Macdonald The Wisdom Page As a college professor and teacher of psychology philosophy and the future Tom Lombardos mind has been drawn toward such questions as How will the human mind evolve in the future In fact how should the human mind evolve and improve itself What might be the standards and ideals that guide this evolution And what role does ethical development or evolution play in this process

The twenty previously published articles collected together in *Wisdom Consciousness and the Future* chronicle the development of Dr Lombardos ideas on these related questions and topics and together constitute a theoretical perspective on the nature of the human mind on how to best educate and evolve the human mind in the future and how to integrate into this vision the central importance of both future consciousness as a key dimension of human consciousness and ethical character virtues True to its title three key themes emerge in this collection wisdom consciousness and the future and all three concepts tie into the authors main contribution to the field of futures studies future consciousness Numerous essays for example *Evolving Future Consciousness through the Pursuit of Virtue* and *The Evolution and Psychology of Future Consciousness* address the nature of future consciousness a term Dr Lombardo defines as the complex set of mental capacities all humans possess for imagining conceptualizing and approaching the future Aside from describing the psychological make up of future consciousness which includes emotional motivational cognitive and personal dimensions the author also explains in numerous essays such as *Developing Constructive and Creative Attitudes about the Future* how to proactively enhance ones future consciousness Other essays deal directly with consciousness and the human mind in the broadest sense as in *The Future Evolution of the Ecology of Mind* and connect this general area of inquiry with the futurist question of how consciousness and mind might evolve in the future Dr Lombardo proposes that the progressive emergence of cosmic consciousness is the central evolutionary trajectory of the human mind Hence this book contains essays on both consciousness of the future and consciousness in the future While the discussion of consciousness and the future fascinates in its own right Dr Lombardo is a holistic and deep thinker who searches for connections among myriad philosophical topics A number of essays address the question of ethics and virtue and how such concepts connect with both future consciousness and the evolution of consciousness in the future He then expands on this theme to explore how virtue applies to the goals of higher education in essays such as *Ethical Character Development and Personal and Academic Excellence* In thinking through the concept of virtue and how it applies to consciousness education and the future Dr Lombardo emphasizes the one key virtue wisdom that provides the center of gravity around which all other character virtues revolve Indeed if any one concept unites the majority of essays in this collection it is wisdom In *The Wisdom of Future Consciousness* the author argues that wisdom is the highest expression of future consciousness and systematically describes the numerous connections between wisdom and heightened future consciousness Further according to the author wisdom is the key ideal that we should model and teach within education now and in the future This argue
