‘Africa Forms the Key’ Suryakanthie Chetty,2021-01-04 This book examines the work of prominent South African geologist Alex Du Toit as a means of understanding the debate around continental drift both in segregation era South Africa and internationally It contextualises Du Toit s work within a particularly formative period of South African science from the paleoanthropological discoveries that sparked debates about the origins of humankind to Jan Smuts own theory of holism Beyond South African scientific discoveries the book sets Du Toit s work against a backdrop of ideological struggles over space both domestically in terms of segregation and nationalism as well as internationally as South Africa sought to assert its position within the Commonwealth These debates were embodied by Du Toit s work on the theory of continental drift which put Africa and South Africa at the centre geologically and geographically The author also focuses on the divisions in geology caused by drift theory tracing the vigorous intellectual debate and dissent indicative of the ideological milieu within which scientific thought is constructed It traces the history of continental drift from its inception in the nineteenth century and later work of Alfred Wegener which was both elaborated upon and substantiated by Du Toit The study further focuses on Du Toit s research on continental drift in South African and South America and the geological fossil and climatological evidence used to bolster this theory

South Africa and the Case for Renegotiating the Peace Pierre du Toit,2016-11-11 South Africa is awash with policy failures and policy confusion We argue firstly that our current discord over policy details has its origin in the celebrated negotiated transition We hold that the vote count of an

85% majority in the Constituent Assembly in 1996 obscured the reality that the Constitution meant different things to different negotiators. The result was that South Africa from the very start of the democratic era lacked a national consensus on how to go about consolidating democracy. We keep on failing to build a proper roof over our democracy because the constitutional foundations are weak. **Regional Powers and Contested Leadership** Hannes Ebert, Daniel

Flemes, 2018-03-19 When do rising powers fail to establish legitimate regional leadership and instead face contestation by their regional challengers? This book investigates how and why the BRICS Brazil Russia India China and South Africa project leadership in South America post Soviet Eurasia South and Southeast Asia and sub Saharan Africa respectively and in what ways their main regional challengers respond. Based on a systematic conceptualization of the types and drivers of leadership and contestation, the authors assess the impact of the rise of regional powers on weaker states' security, sovereignty and status as well as the consequences of contestation for regional economic development and stability and the regional powers' bid for greater voice in global governance. By illuminating the sources and effects of power politics in five regions that are increasingly pivotal for the emerging world order, the volume offers a global comparative analysis of contemporary regional contested leadership that will interest scholars and students of international affairs, foreign policy and area studies.

Trafficking in Persons Report 2017 Office of the Undersecretary for Civilian Security, Democracy, and Human Rights, 2017-08-18 The 2017 Trafficking in Persons Report highlights the successes achieved and the remaining challenges before us on this important issue. The primary focus is to showcase the responsibility of governments to criminalize human trafficking and hold offenders accountable. This year's report theme is increasing criminal accountability of human traffickers and addressing challenges in prosecution, an essential component of 3P paradigm of prosecution, protection and prevention. It provides an overview of the type of human trafficking offenses that are taking place around the world in violation of human rights. The text includes side bars of situational human trafficking experiences to allow the reader to understand the different types that occur throughout the world. High school students and above may find this report helpful for research and writing essays about human rights and law enforcement of human trafficking. American citizens, policy analysts and decision makers, law enforcement personnel and human rights policy activists and advocates and world leaders may refer to this report as a reference on these crimes. These insightful essays focus on the challenges associated with interventions when facing conflict and human rights violations, unmitigated systematic violence, state rebuilding, human mobility and dislocation. Each chapter is linked to the rest through three defining themes that permeate the book: the evolution of humanitarian interventions in a global era, the limits of sovereignty and the ethics of interventions, and the politics of post intervention rebuilding and humanitarian engagement.

The authors incorporate a variety of case studies including Kosovo Timor Leste Syria Libya and Iraq and examine the complexity of interventions across their different dimensions including relevant doctrines such as R2P Use of Force and Human Security
