The Housing Design Handbook David Levitt, Jo McCafferty, 2018-10-04 Everyone deserves a decent and affordable home a truth almost universally acknowledged But housing in the UK has been in a state of crisis for decades with too few homes built too often of dubious quality and costing too much to buy rent or inhabit It doesn't have to be like this Bringing together a wealth of experience from a wide range of housing experts this completely revised edition of The Housing Design Handbook provides an authoritative comprehensive and systematic guide to best practice in what is perhaps the most contentious and complex field of architectural design This book sets out design principles for all the essential components of successful housing design including placemaking typologies and density internal and external space privacy security tenure and community engagement illustrated with case studies of schemes by architecture practices working across the UK and continental Europe Written by David Levitt and Jo McCafferty two recognised authorities in the field and with contributions from more than twenty other leading practitioners The Housing Design Handbook is an essential reference for professionals and students in architecture and design as well as for government bodies housing associations and other agencies involved in housing

Designing San Francisco Alison Isenberg, 2017-08-29 A major urban history of the design and development of postwar San Francisco Designing San Francisco is the untold story of the formative postwar decades when U S cities took their modern shape amid clashing visions of the future In this pathbreaking and richly illustrated book Alison Isenberg shifts the focus from architects and city planners those most often hailed in histories of urban development and design to the unsung artists activists and others who played pivotal roles in rebuilding San Francisco between the 1940s and the 1970s Previous accounts of midcentury urban renewal have focused on the opposing terms set down by Robert Moses and Jane Jacobs put simply development versus preservation and have followed New York City models Now Isenberg turns our attention west to colorful pioneering and contentious San Francisco where unexpectedly fierce battles were waged over iconic private and public projects like Ghirardelli Square Golden Gateway and the Transamerica Pyramid When large scale redevelopment came to low rise San Francisco in the 1950s the resulting rivalries and conflicts sparked the proliferation of numerous allied arts fields and their professionals including architectural model makers real estate publicists graphic designers photographers property managers builders sculptors public interest lawyers alternative press writers and preservationists Isenberg explores how

these centrally engaged arts professionals brought new ideas to city regional and national planning and shaped novel projects across urban suburban and rural borders San Francisco's rebuilding galvanized far reaching critiques of the inequitable competition for scarce urban land and propelled debates over responsible public land stewardship Isenberg challenges many truisms of this renewal era especially the presumed male domination of postwar urban design showing how women collaborated in city building long before feminism's impact in the 1970s An evocative portrait of one of the world's great cities *Designing San Francisco* provides a new paradigm for understanding past and present struggles to define the urban future
