Mysteries Explored Jack Barranger, Paul Tice, 2000 An overall investigation into human origins religion mythology UFOs and other unexplained phenomena Begins by covering the most ancient mysteries about mankind and proceeds up to modern times exploring the evidence and ending with where we currently are from a religious and spiritual standpoint A fascinating look at the development of mankind with the possibility that we have experienced some form of outside intervention in remote times In some ways this intervention may still be with us today *Spirit Boards for Beginners* Alexandra Chauran, 2014-03-08 Answers At Your Fingertips Get answers to your questions about relationships school and career Communicate with your personal spirit guides Contact loved ones who have passed to the other side Whether you want to divine the future or just have fun Spirit Boards for Beginners is an invaluable resource with Step by step instructions for using the board Techniques for self protection Tips to help you avoid being tricked The controversial history of spirit boards Dozens of true spirit board stories While spirit boards have sometimes received a negative reputation they are a perfectly safe way to communicate when used properly Sharing dozens of heartwarming tales and creepy encounters silly games and life changing occurrences author Alexandra Chauran provides everything you need to know to make the most out of your spirit board experience **The Age of Wild Ghosts** Erik Mueggler, 2001-04-09 Annotation Contemporary Chinese history from the Great Leap Famine of the 1950s to the 1990s is traced in this text This era saw great changes in the way that communities were run including the reintroduction of the headman ship system The Myth and Mystery of UFOs Thomas E. Bullard, 2016-10-17 When United Airlines workers reported a UFO at O Hare Airport in November 2006 it was met with the typical denials and hush up that usually accompany such sightings But when a related story broke the record for hits at the Chicago Tribune s website it was clear that such unexplained objects continued to occupy the minds of fascinated readers Why wonders Thomas Bullard don t such persistent sightings command more urgent attention from scientists scholars and mainstream journalists The answer in part lies in Bullard s wide ranging magisterial survey of the mysterious frustrating and ever evolving phenomenon that refuses to go away and our collective efforts to understand it In his trailblazing book Bullard views those efforts through the lens of mythmaking discovering what UFO accounts tell us about ourselves our beliefs and the possibility of visitors from beyond Bullard shows how ongoing grassroots interest in UFOs stems both from actual personal experiences and from a cultural mythology that defines such encounters as somehow alien and how it views relentless official denial as a part of conspiracy to hide the truth He also describes how UFOs have catalyzed the evolution of a new but highly fractured belief system that borrows heavily from the human past and mythic themes and which UFO witnesses and researchers use to make sense of such phenomena and our place in the cosmos Bullard s book takes in the whole spectrum of speculations on alien visitations and abductions magically advanced technologies governmental conspiracies varieties of religious salvation apocalyptic fears and other paranormal experiences Along the way Bullard

investigates how UFOs have inspired books movies and television series blurred the boundaries between science fiction and religion and crowded the Internet with websites and discussion groups From the patches of this crazy quilt he posits evidence that a genuine phenomenon seems to exist outside the myth Enormously erudite and endlessly engaging Bullard s study is a sky watcher s guide to the studies stories and debates that this elusive subject has inspired It shows that despite all the competing interests and errors clouding the subject there is substance beneath the clutter a genuinely mysterious phenomenon that deserves attention as more than a myth

Sovereignty and Jurisdiction in Airspace and Outer Space Gbenga Oduntan, 2011-09-12. Sovereignty and jurisdiction are legal doctrines of a complex nature which have been subject to differing interpretations by scholars in legal literature. The tridimensionality of state territory recognised under customary international law subsists until the present, but there are other territories that do not or cannot belong to any state or political entity which also must be accounted for in legal theory. The issues surrounding sovereignty and jurisdiction are likely to become ever more pressing as globalisation, growing pressure on resources, and the need for energy and national security become acute, and the resolution of special delimitation disputes seems likely to become a vital question in the twenty-first century. As a result of the fast pace of technological developments in air and space activities and the massive increases in air transportation, satellite communications, and space exploration, the need for scholars and practitioners to sharpen their appreciation of the legal and political issues becomes crucial. This book will focus primarily on the issues of sovereignty, jurisdiction, and control in airspace and outer space and their effects on public and private activities, but it will also look at related issues pertaining to the Seas and Antarctica. Commercial exploitation, resource control, and the international regime regulating contractual obligations in relation to transportation of goods and services over all forms of territory will be examined to the extent that they are necessary to explain jurisdictional rights and duties over territory. Older problems of international law, such as crimes in the air and airspace trespass, are treated along with newer developments such as space tourism, as well as growing demand for private ownership and involvement in outer space exploitation. The book goes on to consider the distinction between airspace and outer space and puts forward legal criteria which would allow for the resolution of the spatial delimitation dispute. These criteria would determine where, in spatial terms, the exclusive sovereignty of airspace ends and where outer space, the province of all mankind, begins, and contribute to the jurisprudence of territorial sovereignty and jurisdiction.

The Thinking Space Leona Rittner, W. Scott Haine, 2016-03-03 The cafe is not only a place to enjoy a cup of coffee it is also a space distinct from its urban environment in which to reflect and take part in intellectual debate Since the eighteenth century in Europe intellectuals and artists have gathered in cafes to exchange ideas inspirations and information that has driven the cultural agenda for Europe and the world Without the caf would there have been a Karl Marx or a Jean Paul Sartre The caf as an institutional site has been the subject of renewed interest amongst scholars in the past decade and its role in the development of art ideas and culture has been explored in some detail However few have investigated the ways in which caf's create a cultural and intellectual space which brings together multiple influences and intellectual practices and shapes the urban settings of which they are a part This volume presents an international group of scholars who consider caf's as

sites of intellectual discourse from across Europe during the long modern period Drawing on literary theory history cultural studies and urban studies the contributors explore the ways in which cafes have functioned and evolved at crucial moments in the histories of important cities and countries notably Paris Vienna and Italy Choosing these sites allows readers to understand both the local particularities of each caf while also seeing the larger cultural connections between these places By revealing how the caf operated as a unique cultural context within the urban setting this volume demonstrates how space and ideas are connected As our global society becomes more focused on creativity and mobility the intellectual caf s of past generations can also serve as inspiration for contemporary and future knowledge workers who will expand and develop this tradition of using and thinking in space
