find in a few moments terms that they can use immediately or reprocess for the drafting of a legal text a ruling a contract or a scientific paper For each of the 218 terms identified a simple definition and a few additional elements are proposed Where possible entries also include examples jurisprudence and doctrine The purpose of this space dictionary is to be leafed through as needed to perfect the reader s knowledge It will be updated regularly The Spationary is an invaluable resource providing answers to simple queries a simple rapid and highly operational introduction to the international corpus juris spatialis and an element of playfulness because it is often through playful engagement with words and their definitions that a reader who may feel like an outsider can move into a universe or a scientific discipline **The Indian Space Programme**

Gurbir Singh, 2017-10-17 Fifty years in the making India's Space Programme is fulfilling the vision of its founders and delivering services from space that touch the lives of 1.3 billion people every day. In addition to operating a collection of satellites for weather, Earth observation, navigation and communication, today India has a spacecraft orbiting Mars and a space telescope in Earth orbit. This book provides the big picture of India's long association with science, from historical figures like Aryabhata and Bhaskara to Homi Bhabha and Vikram Sarabhai, the key architects of its space program. It covers the scientific contribution of Indian scientists during the European Enlightenment and industrial revolution. It traces the technological development of Tipu Sultan's use of rockets for war in the 1780s, the all but forgotten contribution of Stephen H. Smith's use of rockets as a means of transport in 1935 in northern India, and the emergence of Sriharikota, India's spaceport, the heart of India's modern Space Programme. A detailed account of how a fishing village in Kerala was transformed into a space centre and used to launch India's first rocket into space on 21 November 1963. A detailed summary of India's space infrastructure, launch vehicles, deep space network, Telemetry, Tracking and Command, and space assets in orbit. Description of how the ordinary people of India benefit from the services delivered by the space programme. Why India chose to go to the Moon and Mars and how it got there. The prospects for India's ambitions in space for human spaceflight, national security and scientific exploration. An analysis of how India's Space Programme may play out on the global stage. Will it compete or collaborate with China, USA and Russia in space. This detailed work in 645 pages, 29 tables and 9 appendices is richly illustrated with 140 illustrations, some images published for the first time, and supported by over 1,000 references. It is written for the non-specialist, offering a big picture view. Post 2030-Agenda and the Role of Space Annette

Froehlich, 2018-06-13 This book provides a deep insight to which extent further improvement should be envisaged to ensure and improve the sustainable development beyond 2030. The Sustainable Development Goals is a set of 17 global goals with 169 associated targets which the state community adopted in 2015. As the world's environment, economy and society is getting more and more technically advanced, it is of high interest to analyze how space and its various applications can support this development. Once the Goals of the 2030 Agenda for Sustainable Development will be achieved, new challenges are waiting. The analysis takes into account a proactive use of artificial intelligence for the development based on space infrastructure. Another important aspect revolves around the economic development, which asks for further analysis of the cryptocurrencies' relationship with space applications and how to use space-based cryptocurrencies for development. Environment-wise, the challenges for a sustainable development on Earth, i.e. water supply, but also in outer space are requested, ensuring a sustainable exploration and exploitation of space and its orbital resources. The book also highlights possible contributions of the post 2030 space industry to global economic development based on satellite technology and the enlargement of the scope of application of satellite data in administration and Justice to ensure development of effective, accountable and transparent institutions at all levels to promote growth, stability and security and peace on global level.
