areas of psychology cognitive psychology psychobiology and psychometrics with the purpose of improving the operational  
and relational definitions of the broad autism phenotype BAP and its measurement process Especially it lies essence in  
psychometrics and its role in reconnecting how people show certain milder autistic behaviours with a theoretical and  
psychometric model capable of representing an operationalization of the construct in the Spanish and English general  
populations and developing a new measurement tool This book is organized into three blocks in the theoretical framework we  
define autism and BAP from a dimensional perspective and expose the state of the art in its conceptualization and  
measurement We finish by establishing the objectives and the research plan The second block deepens into the empirical  
studies conducted during my Ph D apprenticeship The first study presents the Spanish adaptation of the Broad  
Autism Phenotype Questionnaire BAPQ and the second study deepens into the BAPQ psychometric properties from the item  
response theory IRT perspective In the third study the ASD and BAP definitions are harmonized and then a group of experts  
attempts to reshape the items of the most applied tests to assess BAP into its updated operationalization The sixth chapter  
introduces the Broad Autism Phenotype International Test BAP IT which assesses the BAP two domain operationalization in  
two different languages Spanish and English Finally the third block exposes a general discussion of the overall results draws
