recent years there has been an increasing number of monographs and collections about biography in general and literary biography in particular. However, biographies of scientists, engineers, and medical doctors have rarely been the topic of scholarly inquiry. As such, this volume of essays will be welcomed by those interested in the genre of science biography and who wish to re-examine its history, foundational problems, and theoretical implications. Borrowing approaches and methods from cultural studies and the history, philosophy, and sociology of science, the contributions cover a broad range of subjects, periods, and locations. By presenting such a rich diversity of essays, the volume is able to chart the reoccurring conceptual problems and devices that have influenced scientific biographies from classical antiquity to the present day. In so doing, it provides a compelling overview of the history of the genre, suggesting that the different valuations given scientific biography over time have been largely fuelled by vested professional interests.

**Fieldwork in Tourism** Michael C. Hall, 2010-10-04 The inherent mobility of tourists and consequent relative ephemerality of contact between the visitor and the visited tourism phenomenon have specific characteristics that challenge the usual fieldwork practices of the social and physical sciences. The book also discusses how fieldwork affects researchers personally and what happens to field relationships. Divided into five sections, each with an introduction and a guide to further reading, the chapters cover the context of fieldwork, research relationships, politics and power, the position of the researcher in the field, research methods and processes, including virtual fieldwork, and the relationships

between being a tourist and doing fieldwork The concluding chapter suggests that the link between tourism and fieldwork perhaps offers greater insights into understanding creative fieldwork than may be imagined This book incorporates a rich and diverse set of fieldwork experiences insights and reflections on conducting fieldwork in different settings the problems that emerge the solutions that were developed and the realities of being in the field Fieldwork in Tourism is an essential guide for Tourism higher level students academics and researchers embarking on research in this field *Handbook of Arts-Based Research* Patricia Leavy, 2025-01-31 Bringing together interdisciplinary leaders in methodology and arts based research ABR this comprehensive handbook explores the synergies between artistic and research practices and addresses issues in designing implementing evaluating and publishing ABR studies Coverage includes the full range of ABR genres including those based in literature such as narrative and poetic inquiry performance music dance playbuilding visual arts drawing and painting collage installation art comics and audiovisual and multimethod approaches Each genre is described in detail and brought to life with robust research examples Team approaches ethics and public scholarship are discussed as are innovative ways that ABR is used within creative arts therapies psychology education sociology health sciences business and other disciplines The companion website includes selected figures from the book in full color additional online only figures and links to online videos of performance pieces
