**Quality Research Papers** Nancy Jean

Vyhmeister, Terry Dwain Robertson, 2014-02-11 This updated third edition of *Quality Research Papers* fast becoming a standard reference textbook for writing research papers in the fields of religion and theology gives improvements and added material for such things as the expanding field of online research and doing church related research in a professional manner. Because so many new developments have taken place in the field of research especially in terms of electronic research this handy reference explores the ways to do research on the internet including how to document such research. *Quality Research Papers* offers great opportunities to students today especially in distant learning situations to determine which resources can be used and which should be rejected. For this reason Nancy Vyhmeister brought in Terry Robertson Seminary Librarian at Andrews University and professor of the seminary master's level research courses. His expertise in library computers and the Internet are invaluable to the book. In addition to substantial current information on electronic resources and online research this third edition preserves all of the features of the original editions now presented in a newly revised more logical order.

Writing Education Research Joy Egbert, Sherry Sanden, 2015-02-11 For both new academics and those with some experience writing articles of publishable quality can be particularly challenging. Developing the necessary skill set requires useful information, hard work, and the type of direction infrequently offered in research methods courses leaving researchers to piece together resources on their own. This book addresses this critical topic in a format that is easy to teach and understand. It is a practical volume that teaches researchers how to identify their audience, clearly state the nature of their work, provide exceptional literature reviews, cite appropriately, and explicate their research. Beginning each chapter with reviewer comments, *Writing Education Research* is designed to help scholars understand both how to write effective research reports and how to get published. Practice exercises and resource lists in each chapter offer easy access to information about the review and publication process. A perfect accompaniment to standard research courses, this practical book demystifies the writing process for anyone looking to publish articles, chapters, or papers in education.

**The Business Library and how to Use it** Ernest L. Maier, 1996 This newly revised and updated edition formerly titled *How To Use the Business Library* the first in 12 years is a key to timely and relevant business information. Written by two marketing professors and two librarians, this work is divided into four main sections: Introduction to Business Research and the Library, Research Strategies and General Sources of Business Information, Sources of Business Information, and Using What You've Learned. Each of the 16 chapters features an introduction to the topic, an in-depth descriptive list of relevant sources, and research tasks the sources can be used to perform. Expanding coverage on new and emerging technologies in business sources, this edition also provides new methods of accessing this information. Additionally, subject, author, title, organization, and association indexes have been included, as well as more international sources, databases, and government publications. The final chapter section guides the reader through the preparation of a research-based business report. A necessary purchase for academic libraries and very useful in public libraries.
