

Scientific research reports

Format of research reports in the faculty of Science

Research reports in the Sciences contain common elements and generally follow the basic format outlined as follows.

Title

Your title should be brief, topic-specific and informative, clearly indicating the purpose and scope of your study. Include **key words** in your title so that search engines can easily access your work. Example:

Measurement of water flows around Station Pier

Abstract

An abstract is a concise summary that enables readers to quickly assess the contents and direction of your paper.

It should be brief (around 5% of the total), written in a single paragraph and should cover the scope and purpose of your paper.

For more information on writing an abstract please refer to the Academic Skills Flyer: Writing an Abstract.

Introduction

The introduction sets the context for your research. It should supply sufficient background to allow the reader to understand and evaluate the present study without needing to refer to previous publications.

After reading the introduction your reader should understand **exactly** what your research is about, what you plan to do, why you are undertaking this research and which methods you have used.

Introductions generally include:

- the **rationale** for the present study. Why are you interested in this topic? Why is this topic worth investigating?
- **key terms and definitions**
- an **outline** of the research questions and hypotheses; the assumptions or propositions that your research will test.

Literature Review

A literature review is a critical survey of recent relevant research in a particular field. Its purpose is both to offer the reader an overview of the current state of research and to situate your paper within that research.

Frequently, the review is part of the introduction

The review should be a selection of carefully organised, focused and relevant literature that develops a narrative 'story' about your topic. Your review should answer key questions about the literature:

- What is the current state of knowledge on the topic?
- What differences in approaches / methodologies are there?
- Where are the strengths and weaknesses of the research?
- What further research is needed?

The review may identify a gap in the literature which provides a rationale for your study and supports your research questions and methodology.

Methodology (Materials and Methods)

The purpose of this section is to detail how you conducted your research so that others can understand and replicate your approach. You need to briefly describe the subjects (if appropriate), any equipment or materials used and the approach taken.

If the research method or method of data analysis is commonly used within your field of study, then simply reference the procedure. If, however, your methods are new or controversial then you need to describe them in more detail and provide a rationale for your approach.

The methodology is always written in the past tense. This section should be written succinctly.

Results

This section is a concise, tabular or graphic summary of your findings, listed under headings appropriate to your research questions.

Present your results in a consistent manner. For example, if you present the first group of results as percentages, it will be confusing for the reader and difficult to make comparisons of data if later results are presented as fractions or as decimal values.

Do not discuss your results here. Any analysis of your results occurs in the Discussion section.

Raw data or details about the method of statistical analysis used should be included in the Appendices.

Writing A Scientific Research Report

Matthew Rehart

Writing A Scientific Research Report:

Writing Scientific Research Articles Margaret Cargill, Patrick O'Connor, 2011-09-13 Margaret Cargill's background as a linguist and research communications educator and Patrick O'Connor's experience as both research scientist and educator synergize to improve both the science and art of scientific writing. If the authors' goal is to give scientists the tools to write and publish compelling well-documented clear narratives that convey their work honestly and in proper context, they have succeeded admirably. *Veterinary Pathology* July 2009. The book is clearly written, has a logical step-by-step structure, is easy to read, and contains a lot of sensible advice about how to get scientific work published in international journals. The book is a most useful addition to the literature covering scientific writing. *Aquaculture International* April 2009. **Writing Scientific Research Articles: Strategy and Steps** guides authors in how to write as well as what to write to improve their chances of having their articles accepted for publication in international peer-reviewed journals. The book is designed for scientists who use English as a first or an additional language for research students and those who teach them paper-writing skills and for early career researchers wanting to hone their skills as authors and mentors. It provides clear processes for selecting target journals and writing each section of a manuscript, starting with the results. The stepwise learning process uses practical exercises to develop writing and data presentation skills through analysis of well-written example papers. Strategies are presented for responding to referee comments as well as ideas for developing discipline-specific English language skills for manuscript writing. The book is designed for use by individuals or in a class setting. Visit the companion site at www.writeresearch.com.au for more information.

Designing and Writing Scientific Research Papers Thomas Annesley, American Association for Clinical Chemistry Staff, 2014-07

Writing and Publishing Science Research Papers in English Karen Englander, 2013-10-11 This book provides a comprehensive review of the current knowledge on writing and publishing scientific research papers and the social contexts. It deals with both English and non-Anglophone science writers and presents a global perspective and an international focus. The book collects and synthesizes research from a range of disciplines including applied linguistics, the sociology of science, sociolinguistics, bibliometrics, composition studies, and science education. This multidisciplinary approach helps the reader gain a solid understanding of the subject. Divided into three parts, the book considers the context of scientific papers, the text itself, and the people involved. It explains how the typical sections of scientific papers are structured. Standard English scientific writing style is also compared with science papers written in other languages. The book discusses the strengths and challenges faced by people with different degrees of science writing expertise and the role of journal editors and reviewers.

How to Write and Publish a Scientific Paper Robert A. Day, Barbara Gastel, 2006-04-26 Guide on writing and submitting a scientific paper for graduates to professionals.

Writing Scientific Research Articles Margaret Cargill, Patrick O'Connor, 2021-06-01 **Writing Scientific Research Articles** The new edition of the popular guide for novice and professional scientists alike, providing effective strategies and step-by-

step advice for writing scientific papers for publication For scientists writing a research article for submission to an international peer reviewed journal knowing how to write can be as important as knowing what to write Writing Scientific Research Articles Strategy and Steps provides systematic guidance on writing effective scientific papers with the greatest chance for publication Using clear language this highly practical guide shows scientists how to apply their analysis and synthesis skills to produce a compelling research article and increase their competence in written communication of science The third edition is fully revised to reflect changes in the review process and science journal publication Incorporating current developments in technology and pedagogical practice brand new sections cover mapping and planning manuscripts choosing results systematic reviews structured abstracts and more Updated material on referee criteria offers valuable insights on what journal editors and referees want to publish and why Offering a hands on approach to developing the academic writing skills of scientists in all disciplines and from all language backgrounds Writing Scientific Research Articles provides a genre based pedagogy and clear processes for writing each section of a manuscript across the full range of research article formats and funding applications presents tested strategies for responding to referee comments and developing discipline specific language skills for manuscript writing and polishing pairs each learning step with updated practical exercises to develop writing and data presentation skills based on expert analysis of well written papers including provided example articles includes chapters on the difference between review papers and research papers and on skill development using journal clubs and writing groups features a wealth of new information on topics including Open Access publishing online reviews and predatory conferences and journals Designed for use by individuals as a self study guide or by groups working with an instructor Writing Scientific Research Articles Strategy and Steps is a must have guide for early career researchers with limited writing experience scientists for whom English is an additional language upper level undergraduates and graduate students writing for publication and STEM and English language professionals involved in teaching manuscript writing and publication skills and mentoring students and colleagues

How to Write and Publish a Scientific Paper Robert A. Day, Barbara Gastel, 2006 This thoroughly revised edition of a classic handbook is the essential guide every scientist needs to achieve success in today's competitive environment It gives beginning scientists and experienced researchers alike practical advice on writing about their work and publishing what they write

Writing for Science Robert Goldbort, 2006-01-01 This book encompasses the entire range of writing skills that today's experimental scientist may need to employ Chapters cover routine forms such as laboratory notes abstracts and memoranda dissertations journal articles and grant proposals Robert Goldbort discusses how best to approach various writing tasks as well as how to deal with the everyday complexities that may get in the way of ideal practice difficult collaborators experiments gone wrong funding rejections He underscores the importance of an ethical approach to science and scientific communication and insists on the necessity of full disclosure

Writing Scientific Research in Communication Sciences and Disorder Robert H.

Brookshire, Shelley B. Brundage, 2015-11-02 Writing Scientific Research in Communication Sciences and Disorders is a comprehensive guide to the preparation and publication of research papers for researchers in communication sciences and disorders Individual chapters address the structure content and style of the introduction method results and discussion sections of a research paper The balance of the text examines the writing process including the nuts and bolts of preparing tables and graphs reviewing different voices and grammar issues editing your own work working with editors and peer reviewers and getting started toward becoming a productive writer Each topic is illustrated with informative examples with clear direct and often humorous discussion of what makes the examples good or bad Writing is essential in nearly every profession and particularly in communication sciences and disorders where researchers must be able to express complex ideas to a variety of audiences from colleagues to members of health care teams to clients and family members Therefore competency in written expression is required for certification and entry into clinical practice in communication sciences and disorders Writing Scientific Research in Communication Sciences and Disorders will be a valuable supplementary text for undergraduate and graduate students in courses that include writing assignments and critical assessment of research literature such as research methods and evidence based clinical methods courses as well as in thesis and dissertation preparation Researchers looking for a guide to help improve their own writing will also find this text to be an invaluable resource that answers the big and little questions that arise in preparing manuscripts

How to Write and Illustrate a Scientific Paper Björn Gustavii, 2008-02-28 This second edition of How to Write and Illustrate a Scientific Paper will help both first time writers and more experienced authors in all biological and medical disciplines to present their results effectively Whilst retaining the easy to read and well structured approach of the previous edition it has been broadened to include comprehensive advice on writing compilation theses for doctoral degrees and a detailed description of preparing case reports Illustrations particularly graphs are discussed in detail with poor examples redrawn for comparison The reader is offered advice on how to present the paper where and how to submit the manuscript and finally how to correct the proofs Examples of both good and bad writing selected from actual journal articles illustrate the author's advice which has been developed through his extensive teaching experience in this accessible and informative guide

The Scientist's Handbook for Writing Papers and Dissertations Antoinette Miele Wilkinson, 1991 A step by step guide to the preparation and writing of scientific papers and dissertations in the biological physical and social sciences offering advice on how to set and achieve writing objectives and how to structure and organize material

How to Write Psychology Research Reports & Essays Bruce Findlay, 2014-09-01 How to Write Psychology Research Reports and Essays 7e is endorsed by the Australian Psychological Society and is a useful reference to the strict guidelines required by the APS and the APA American Psychological Association styles A student who grasps these concepts and learns the conventions will have a sound basis for presenting research in a professional manner and writing well argued essays so that the later step of writing for publication

should be an easier one to take **Handbook of Research on Connecting Research Methods for Information Science Research** Ngulube, Patrick, 2019-12-13 In today's globalized world viable and reliable research is fundamental for the development of information. Innovative methods of research have begun to shed light on notable issues and concerns that affect the advancement of knowledge within information science. Building on previous literature and exploring these new research techniques are necessary to understand the future of information and knowledge. The Handbook of Research on Connecting Research Methods for Information Science Research is a collection of innovative research on the methods and application of study methods within library and information science. While highlighting topics including data management, philosophical foundations, and quantitative methodology, this book is ideally designed for librarians, information science professionals, policymakers, advanced level students, researchers, and academicians seeking current research on transformative methods of research within information science.

Uniting Knowledge Integrated Scientific Research For Global Development Seven editors, **Writing and Publishing a Scientific Research Paper** Subhash Chandra Parija, Vikram Kate, 2017-07-28 This book covers all essential aspects of writing scientific research articles, presenting eighteen carefully selected titles that offer essential must-know content on how to write high-quality articles. The book also addresses other rarely discussed areas of scientific writing, including dealing with rejected manuscripts, the reviewer's perspective as to what they expect in a scientific article, plagiarism, copyright issues, and ethical standards in publishing scientific papers. Simplicity is the book's hallmark, and it aims to provide an accessible, comprehensive, and essential resource for those seeking guidance on how to publish their research work. The importance of publishing research work cannot be overemphasized. However, a major limitation in publishing work in a scientific journal is the lack of information on or experience with scientific writing and publishing. Young faculty and trainees who are starting their research career are in need of a comprehensive guide that provides all essential components of scientific writing and aids them in getting their research work published.

Science and Technical Writing Philip Rubens, 2002-09-11 With this new edition, Science and Technical Writing confirms its position as the definitive style resource for thousands of established and aspiring technical writers. Editor Philip Rubens has fully revised and updated his popular 1992 edition with full authoritative coverage of the techniques and technologies that have revolutionized electronic communications over the past eight years.

Research Methods in Psychology Paul G. Nestor, Russell K. Schutt, 2014-03-12 The Second Edition of Paul G. Nestor and Russell K. Schutt's successful and unique Research Methods in Psychology: Investigating Human Behavior draws from substantive research stories to illustrate how research is presented while systematically unifying the entire research process within a conceptual framework. This accessible text examines engaging research studies and examples, considering research ethics throughout. This is a great text that emphasizes the important concepts within research methods. The resources are excellent; they incorporate up-to-date research and technology and introduce the student to empirical articles, and the information is

presented in a way that challenges the student to apply the material Maria Pacella Kent State University The text is comprehensive It covers a wide variety of information without being overwhelming This is a very good textbook for an introductory course in research methods I like that its focus is on psychological research specifically Angela M Heads Prairie View A M University

Writing Centres in Higher Education Laura Dison, Sherran Clarence, 2017-01-01 Writing Centres in South Africa and globally are now well established academic support centres within many universities Historically tasked with supporting students as they grapple with the demands of academic writing many centres are now moving beyond their own walls to work with academic tutors lecturers and departments to rethink the ways in which knowledge is transformed into different kinds of disciplinary writing This move raises pertinent questions for writing centre directors tutors consultants and for the universities that house them how does a centre tasked with supporting more general academic literacy development through writing pedagogies initiate students into a range of particularised discourse communities How do writing centre staff and disciplinary lecturers negotiate their shared and separate concerns for student learning through collaborative writing development projects How do writing centres work with assignments and forms of literacy that challenge them to reconfigure their own pedagogical practices and expand their conceptions of writing support How do writing centres maintain their core focus as they move flexibly beyond their own spaces to understand the nature of disciplinary writing This collection of essays reflects on the ways in which writing centres in South Africa are working in and across disciplines Institutional constraints and challenges that arise from these collaborations are addressed and opportunities for transforming teaching and learning spaces are explored The chapters speak to the global move in higher education to reconsider how knowledge is made who makes it and how support and development opportunities for students and lecturers should be created and sustained across the disciplines This volume contributes to the body of knowledge in the growing field of the scholarship of teaching and learning in higher education in South Africa It builds on the work of the first collection of such essays *Changing Spaces Writing Centres and Access to Higher Education* Eds A Archer and R Richards 2011 SUN PReSS to understand why working within the disciplines is so critical for writing development in a South African context

Resources in Education , 2001-04

Writing Business Research Reports Matthew Rehart, 2021-05-13 A useful handbook this text presents guidelines frequently followed by writers of reports of empirical research designed for publication in scientific business journals The guidelines describe the types of information that should be included how this information should be expressed and where various types of information should be placed within a report Excerpts from journal articles are used to illustrate most of the guidelines At the end of each chapter there are questions for classroom discussion

Science for Exercise and Sport David James, Craig Williams, 2014-05-01 This handbook is written for undergraduate sport studies and sport and exercise students It introduces students to the basic scientific principles that will underpin their learning and is aimed primarily at those who have little or no background in science Craig Williams and David

James apply key scientific concepts to real situations to better understand the principles at work Clearly divided into three sections the text covers the three physical states of gas liquid and solid explanations of forces energy and electricity including pressure torque and joint velocity data analysis ICT and report writing important areas for the scientist Science for Exercise and Sport provides the student with all the basic scientific background information they need and demonstrates how the theory can be used to map and monitor the human body in the sport and exercise discipline

Writing A Scientific Research Report Introduction

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In today's fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free Writing A Scientific Research Report PDF books and manuals is the internet's largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek. The availability of free PDF books and manuals on this platform demonstrates its commitment to democratizing education and empowering individuals with the tools needed to succeed in their chosen fields. It allows anyone, regardless of their background or financial limitations, to expand their horizons and gain insights from experts in various disciplines. One of the most significant advantages of downloading PDF books and manuals lies in their portability. Unlike physical copies, digital books can be stored and carried on a single device, such as a tablet or smartphone, saving valuable space and weight. This convenience makes it possible for readers to have their entire library at their fingertips, whether they are commuting, traveling, or simply enjoying a lazy afternoon at home. Additionally, digital files are easily searchable, enabling readers to locate specific information within seconds. With a few keystrokes, users can search for keywords, topics, or phrases, making research and finding relevant information a breeze. This efficiency saves time and effort, streamlining the learning process and allowing individuals to focus on extracting the information they need. Furthermore, the availability of free PDF books and manuals fosters a culture of continuous learning. By removing financial barriers, more people can access educational resources and pursue lifelong learning, contributing to personal growth and professional development. This democratization of knowledge promotes intellectual curiosity and empowers individuals to become lifelong learners, promoting progress and innovation in various fields. It is worth noting that while accessing free Writing A Scientific Research Report PDF books and manuals is convenient and cost-effective, it is vital to respect copyright laws and intellectual property rights. Platforms offering free downloads often operate within legal

boundaries, ensuring that the materials they provide are either in the public domain or authorized for distribution. By adhering to copyright laws, users can enjoy the benefits of free access to knowledge while supporting the authors and publishers who make these resources available. In conclusion, the availability of Writing A Scientific Research Report free PDF books and manuals for download has revolutionized the way we access and consume knowledge. With just a few clicks, individuals can explore a vast collection of resources across different disciplines, all free of charge. This accessibility empowers individuals to become lifelong learners, contributing to personal growth, professional development, and the advancement of society as a whole. So why not unlock a world of knowledge today? Start exploring the vast sea of free PDF books and manuals waiting to be discovered right at your fingertips.

FAQs About Writing A Scientific Research Report Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Writing A Scientific Research Report is one of the best book in our library for free trial. We provide copy of Writing A Scientific Research Report in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Writing A Scientific Research Report. Where to download Writing A Scientific Research Report online for free? Are you looking for Writing A Scientific Research Report PDF? This is definitely going to save you time and cash in something you should think about.
