**Federal Register** , 2000-06-27      **Vagueness in Normative Texts** Vijay K. Bhatia, 2005 Normative texts are meant to be highly impersonal and decontextualised yet at the same time they also deal with a range of human behaviour that is difficult to predict which means they have to have a very high degree of determinacy on the one hand and all inclusiveness on the other This poses a dilemma for the writer and interpreter of normative texts The author of such texts must be determinate and vague at the same time depending upon to what extent he or she can predict every conceivable contingency

that may arise in the application of what he or she writes The papers in this volume discuss important legal and linguistic aspects relating to the use of vagueness in legal drafting and demonstrate why such aspects are critical to our understanding of the way normative texts function

**Drafting Cayman Islands Trusts** James Kessler, Tony Pursall, 2006-01-01 The Cayman Islands is one of the world's leading jurisdictions for the establishment of offshore trusts. However, it is not easy for a practitioner to approach the drafting of a Cayman Islands trust instrument with confidence. This eminently practical book solves that problem to near perfection. Arranged as a collection of precedents with each provision of every precedent explained in detail, *Drafting Cayman Islands Trusts* could hardly make the drafting process easier. The drafter learns the advantages and potential pitfalls associated with each provision as he or she prepares to draft it. The authors provide specific language although individual variations based on the authors' expert guidance are encouraged. The precedents covered include the following: Discretionary trusts with and without protectors; Interest in possession trust; Reserved powers trust; Charitable trust; STAR trusts; Appointments and retirements of trustees. For additional convenience, the precedents are also provided in Word format on a CD-ROM that comes with the book. The detailed annotation answers such key questions as the following: Are hostile beneficiaries clauses valid? Do automatic flee clauses work? What powers can a settlor reserve? How can STAR trusts be used to protect trustees holding high risk assets? Would STAR trusts be recognised in other jurisdictions? How can one restrict a beneficiary's right to information and trust documents? Can the appointment of a foreign trustee discharge a retiring Cayman trustee? What indemnities should retiring trustees request from successors? As a systematic approach to drafting Cayman Islands trusts, this book will be of immeasurable day to day value to practitioners and administrators alike. James Kessler QC is a leading practitioner at the Revenue bar. He is the author of *Drafting Trusts and Wills*, *Trusts Taxation of Foreign Domiciliaries* and *Taxation of Charities*. He is a founder member of STEP and founder of the Trusts Discussion Forum. Tony Pursall is a Cayman Islands attorney at law who practices from the London office of Maples and Calder. He is a member of the STEP International Committee and of the City of London branch committee of STEP. He is the author of the Cayman Islands section of the *World Trust Survey for Trustees* and is a contributor to the Cayman Islands section of *Planning and Administration of Offshore and Onshore Trusts*. "All those who work with Cayman Islands trusts here or abroad should leap to their feet and applaud James Kessler and Tony Pursall for this splendid work." Antony Duckworth, Partner, Charles Adams Ritchie and Duckworth.
